The first in an epic new fantasy series, introducing an unforgettable new heroine and a stunningly original dystopian steampunk world with a flavor of feudal Japan. A DYING LAND The Shima Imperium verges on the brink of environmental collapse; an island nation once rich in tradition and myth, now decimated by clockwork industrialization and the machine-worshippers of the Lotus Guild. The skies are red as blood, the land is choked with toxic pollution, and the great spirit animals that once roamed its wilds have departed forever. AN IMPOSSIBLE QUEST The hunters of Shima's imperial court are charged by their Shogun to capture a thunder tiger – a legendary creature, half-eagle,

half-tiger. But any fool knows the beasts have been extinct for more than a century, and the price of failing the Shogun is death. A HIDDEN GIFT Yukiko is a child of the Fox clan, possessed of a talent that if discovered, would see her executed by the Lotus Guild. Accompanying her father on the Shogun's hunt, she finds herself stranded: a young woman alone in Shima's last wilderness, with only a furious, crippled thunder tiger for company. Even though she can hear his thoughts, even though she saved his life, all she knows for certain is he'd rather see her dead than help her. But together, the pair will form an indomitable friendship, and rise to challenge the might of an empire. Road & Track Rowman & Littlefield In 2015, Congress tasked the Department of Defense to commission an independent assessment of U.S. military strategy and force posture in the Asia-Pacific, as well as that of U.S. allies and partners, over the next decade. This CSIS study fulfills that congressional requirement. The authors

assess U.S. progress to date and recommend initiatives necessary to protect U.S. interests in the Pacific Command area of responsibility through 2025. Four lines of effort are highlighted: (1) Washington needs to continue aligning Asia strategy within the U.S. government and with allies and partners; (2) U.S. leaders should accelerate efforts to strengthen ally and partner capability, capacity, resilience, and interoperability; (3) the United States should sustain and expand U.S. military presence in the Asia-Pacific region; and (4) the United States should accelerate development of innovative capabilities and concepts for U.S. forces.

Handbook of Sports Medicine and Science Independently Published Japan's traditional and fragile satoyama landscape system was developed over centuries of human life on mountainous island terrain in a monsoon climate. The carefully managed coppice woodlands on the hillsides, the villages strung along the base of the hills, and the carefully tended paddy fields of rural Japan made possible the sustainable interaction of nature and humans. Radical changes in the middle of the twentieth century led to the abandonment of satoyama landscapes which now are being rediscovered. There is a new realization that these woodlands still play a vital role in the management of the Japanese landscape and a new determination to manage them for the future. This multifaceted book explores the history, nature, biodiversity, current conservation measures, and future uses of satoyama.

The information presented here will be of interest in all parts of the world where patterns of sustainable development are being sought.

Light and Heavy Vehicle Technology Robert Bentley, Incorporated The First World War marked the end point of a process of German globalization that began in the 1870s. Learning Empire looks at German worldwide entanglements to recast how we interpret German imperialism, the origins of the First World War, and the rise of Nazism.

This volume merges four streams of inquiry and interpretation in a study of the evolution and emergence of Japan's leading industrial firms during the twentieth century. First, it is a historical study of how the industrial institutions of modern Japan appeared and matured. Second, it is an organization study of the basic forms of social and economic interaction in

Japan. Third, it is a development study of how circumstances of rapid technical and economic change have shaped the Japanese business system. It is also a strategy study of how Japanese managers have responded to and shaped these circumstances. This fourfold synthesis offers a model of institutional development under conditions of late economic development and private initiative that falls somewhere between a capitalist development state and a free market economy. Business policy rather than industrial policy is accentuated, revealing a set of robust institutions and a dynamic to activate and interrelate them.

As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces

bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. Appearing in paperback for the first time—with twenty arresting new photos and an extensive Q&A with the author—Unbroken is an unforgettable testament to the resilience of the human mind, body, and spirit, brought vividly to life by Seabiscuit author Laura Hillenbrand. Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next

steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. *Autonomous Horizons: The Way Forward* identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.

One of America's greatest military aviation historians relates the astonishing--and true--story of the only American warplane to fight in every operational theater in World War II from Pearl Harbor to Alaska and North Africa to Northern Europe. "One of the greatest tests of its capabilities took place in mid-April of 1943 when Allied intelligence discovered that Admiral Isoroku Yamamoto was going to visit Kahili on the coast of Bougainville. A P-38 intercept was planned. Its time of arrival had to be absolutely perfect and after a complex 435 mile wave-top approach that avoided all Japanese observers the Lightnings were there. Eighteen P-38s were assigned to "get Yamamoto" and that is exactly what happened." --From the introduction by David Ballantine
