New Directions in the Analysis of Multimodal Discourse offers a comprehensive international view of multimodal discourse and presents new directions for research and application in this growing field. With contributions from top scholars around the world, this work opens up the field of multimodal discourse analysis as it covers a wide range of interests such as computational linguistics, education, ideology, and media discourse. The range and scope of the chapters in this book provide groundbreaking insights into exploring and accounting for the various facets of multimodality in a range of texts and contexts. Initial chapters specifically aim to tackle theoretical issues, while subsequent chapters focus on important research areas such as writing and graphology, genre, ideology,

computational concordancing, literacy, and cross cultural and cross linguistic issues. In the final chapters, an emphasis is placed on the educational implications of multimodality in first and second language contexts, a particularly new and interesting contribution. This book presents the career narratives of an under-researched group of teachers: immigrant Filipino teachers of English working mainly with young and very young learners in Japan. It provides a nuanced and revealing critique of poststructuralist views of identity and proposes recognition theories as an alternative perspective. It explores the role of the community found in language teacher associations in the formation and strengthening of language teacher identity and reveals new insights into morality and social justice in language teacher identity. The narratives of the teachers and the communities of which they are part demonstrate how prejudice affects these teachers' lives, and how speaking about and celebrating success can affirm individual and group identity. The College Academic Writing: A Genre-Based Perspective course book is organized based on genre perspective. It teaches and trains the students about the writing process and content writing. It also guides them to identify to whom the writing is, for what purpose it is, and to what context it is used. It is commonly understood that in teaching writing to students with low entry level of English proficiency, there is always the risk of sacrificing creativity in order to achieve accuracy, or vice versa. College Academic Writing: A Genre-Based Perspective is designed to guide and help students about the process of writing and the product of the writing itself in such a way that the final work of writing is not only expressive and rich in content but also clear and accurate, as well as relevant to their needs. A Writer's Guide to Fiction R.I.C. Publications
The Routledge Handbook of Corpus Linguistics provides a timely overview of a dynamic and rapidly growing area with a widely applied methodology. Through the electronic analysis of large bodies of text, corpus linguistics demonstrates and supports linguistic statements and assumptions. In recent years it has seen an ever-widening application in a variety of fields: computational linguistics, discourse analysis, forensic linguistics, pragmatics and translation studies. Bringing together experts in the key areas of development and change, the handbook is structured around six themes which take the reader through building and designing a corpus to using a corpus to study literature and translation. A comprehensive introduction covers the historical development of the field and its growing influence and application in other areas. Structured around five headings for ease of reference, each contribution includes further reading sections with three to five key texts highlighted and annotated to facilitate further exploration of the topics. *The Routledge Handbook of Corpus Linguistics* is the ideal resource for advanced undergraduates and postgraduates.

Studies of Acquisition and Development John Benjamins Publishing Company
Currently there is a movement in linguistics towards careful use of corpora in linguistic and text analysis, which has involved both written and spoken corpora and those which combine spoken and written text. Most text analyses address written texts - often literary works - but detailed discussion of the language of a single oral text from multiple perspectives has rarely been published. This book is among the first to integrate the analysis of the language of spoken and written texts. It describes language as a network of functional relations involving a context which is also a network of functional relations. The essays in Part One present several perspectives on the theory of language as functional relations; those in Part Two discuss a single oral text using a variety of functional perspectives. All of the essays are by linguists interested in oral and written texts, who have achieved international recognition in their fields. Illustrated in this book are

cognitive, social construction, social praxis and anthropological approaches to the description of text.

Writing Matters is designed to develop students' writing ability and give them the confidence to use this ability in everyday life. Through extensive use of real-life examples it provides useful models for students and teachers to work from and discuss in the classroom. It emphasises that writing is a process and also that the demands of writing vary depending on the reader, the purpose, the content and the writing situation. Accordingly, the book is divided into two parts. Part 1 deals with basic procedures such as preparing, drafting and revising texts and also offers help in the often difficult areas of spelling and punctuation. Part 2 focuses on writing contexts ranging from the functional (letters of application, postcards, advertisements) to more creative, personal writing. The units in this part give practice in all these different types of writing. This book - guides students progressively towards proficient and effective writing - uses lively, authentic material as models - is relevant to students' real-life needs and interests - can be used flexibly as a course or as supplementary material. Written by experienced teachers specialising in writing skills development, *Writing Matters* can also be used by adult speakers of English as a first language and secondary school students.

This monograph presents an ecological perspective to the study of language maintenance and shift in immigrant contexts. The ecology incorporates past, present and future and treats spatial and temporal dimensions as the main organizing frames in which everyday language use and identity development can be explored. The methods combine a quantitative domain-based sociolinguistic survey with discourse analytic approaches. The novel approach is valuable for fellow researchers working in interdisciplinary fields of language maintenance, language shift, multilingualism and language planning in migration contexts. The ecological perspective adds to sociolinguistic theories of globalization and responds to current dynamics of translocality

in modern immigrant contexts. The research presents language use and language planning efforts in the Sudanese community of Australia. Language, culture, race and ethnic identity are explored in unique sociolinguistic contexts using an emic research lens and giving voice to the participants.

Multimodality and Cognitive Linguistics Routledge
"Drawing on wide-ranging literature from a variety of relevant disciplines, as well as their own extensive experience in teaching spoken English, the authors give a fascinating, comprehensive, and insightful account of the nature of second language speaking skills. The research and theory they survey then serves as the basis for the principles, strategies, and procedures they propose for the teaching of spoken English. This book will, therefore, provide an invaluable resource for teachers, teachers in training, and researchers, providing both a state-of-the-art survey of the field as well as a source of practical ideas for those involved in planning, teaching, and evaluating courses and materials for the teaching of spoken English"--

Alexander's Outing Routledge

In this pathfinding study, Suzanne Fleischman brings together theory and methodology from various quarters to shed important new light on the linguistic structure of narrative, a primary and universal device for translating our experiences into language. Fleischman sees linguistics as laying the foundation for all narratological study, since it offers insight into how narratives are constructed in their most primary context: everyday speech. She uses a linguistic model designed for "natural" narrative to explicate the organizational structure of "artificial" narrative texts, primarily from the Middle Ages and the postmodern period, whose seemingly idiosyncratic use of tenses has long perplexed those who study them. Fleischman develops a functional theory of tense and aspect in narrative that accounts for the wide variety of functions—pragmatic as well as grammatical—that these two categories of grammar are called upon to perform in the linguistic economy of a narration.
