The Book about Getting Older (for People Who Don't Want to Talk about It) Human Kinetics

In most societies of the world, including in Africa, re- sponsibility for the material support of older people unable to sustain themselves through work or investments originally resided with their younger generational family members--especially their adult children. Aboderin explores this topic specifically for Africa. In the wake of social or economic change, societies experience shifts in the degree to which families support their elders. Questions about the proper balance of family and state responsibility, however, persist, especially in light of socio-demographic trends and constraints in public expenditure. In most of sub-Saharan Africa, in contrast to other world regions, economic security policies for older people have not yet been

formulated, despite declines in material family support along with rising poverty to which a growing elderly population is exposed. In part, this betrays the crucial lack of understanding about how and why these shifts in support have occurred in African societies--and, thus, a profound uncertainty about what balance of individual, family, and state responsibilities will be culturally appropriate and effective in ensuring economic security for older Africans both now and in the future. Aboderin aims to address these gaps in understanding. She provides an empirical and theoretical analysis of the micro and macro level processes that have underpinned recent declines in old age family support in African societies and likely parameters of future familial support. She also addresses more fundamental theoretical questions about how we should think about the relationships between intergenerational support, norms and values, and societal change. Intergenerational Support in Africa will be of interest to students of African studies, economic policy and theory concerning eldercare, sociology, and social welfare development.

Get the most out of property investment and secure your financial future 7 Steps to Wealth is the only real estate book in Australia endorsed by three of Australia's property billionaires. It shares John L. Fitzgerald's own 35-year proven property strategy, supported statistically and with real life case studies from readers of earlier editions. Now in its 8th edition the book is completely up-to-date with the latest census data, location criteria and growth forecasts. Most importantly the book exposes the difference between property and real estate, proving that it's only the land that appreciates and that the buildings that sit on the land actually depreciate. Indeed 7 Steps to Wealth uses Warren Buffet's secret of compound growth but adapted for Australian property investors. Fitzgerald proves that certain residential land is Australia's best growth asset -- and will continue to be given current record population growth. • Unlock the secret power of compound growth and make it work for you • Avoid the common mistakes that most property investors make • Read case studies and testimonials from millionaires using the 7 step strategies • Understand how to safely build wealth in property, be cashflow positive and still get a tax deduction. With Australia's record population growth, there is no better time for Australians to use this proven strategy to safely build wealth for a comfortable retirement, one that doesn't mean relying on government welfare.

**7 Steps to Wealth Springer Nature**  
A unique insight into the decision-making and food consumption of the

European consumer. The volume is essential reading for those involved in product development, market research and consumer science in food and agro industries and academic research. It brings together experts from different disciplines in order to address the fundamental issues related to predicting food choice, consumer behavior and societal trust in quality and safety regulatory systems. The importance of the social and psychological context and the cross-cultural differences and how they influence food choice are also covered in great detail.

'The most important book about the second  
half of your life you'll ever read. I wish  
everyone in the UK could be under Dr Lucy's  
care, but this is the next best thing'  
SANDI TOKSVIG 'This warm and compassionate

book gets to the heart of older age. Using stories  
and accessible explanations, it covers issues of  
declining health, quality of life and choices  
about the things that matter most' THE  
BRITISH GERIATRICS SOCIETY \_\_\_\_\_

Now more than ever, we need to talk about  
getting older. Many of us are living to a very  
great age. But how do we give those we love,  
and eventually ourselves, long lives that are as  
happy and healthy as possible? Dr Lucy's book  
gives us answers to the questions we can voice -  
and those that we can't. A long life should be  
embraced and celebrated, but it's not all easy.  
Yet even the most challenging situation can be  
helped by the right conversation. How do we  
start? How do we ask whether it's worth taking  
seven different medicines? Is it normal to find  
you're falling out of love with someone, as they  
disappear into dementia? Should Dad be  
driving, and if not, who can stop him? What are  
the secrets of the best care homes? When does  
fierce independence become bad behaviour?  
How do you navigate near-impossible  
discussions around resuscitation and intensity of  
treatments? And who decides what happens  
when we become ill? Serious, funny, kind and  
knowledgeable, this readable book helps guide  
us through essential conversations about getting  
older that go straight to the heart of what  
matters most.

"In Stupid things I won't do when I get old,  
Petro candidly addresses the fears, frustrations,  
and stereotypes that accompany aging. He  
offers a blueprint for the new old age, and an  
understanding that aging and illness are not the  
same. As he writes, 'I meant the list as a  
pointed reminder--to me--to make different  
choices when I eventually cross the threshold to  
'old'" -- Excerpt from jacket flap.
