Even in a country where outstanding achievements have become almost a commonplace, the Japanese architect, Kisho Kurokawa, appears as both a remarkable and a remarkably successful man. With buildings in the United States and Eastern and Western Europe as well as in Japan, he has established an international reputation as a leading figure amongst the younger generation of architects. At the age of forty he already had thirty-five major buildings and seventeen books to his credit; four new towns are being built to his

designs; he heads a company of over a hundred employees, he runs a think-tank and an urban design bureau and for variety he has his own television programme with a regular audience of some 30 million. Behind these statistics lies a prodigious vitality expressed in original and stimulating buildings. -- from book jacket.

A fascinating illustrated look at various forms of Japanese popular culture: pop song, jazz, enka (a popular ballad genre of music), karaoke, comics, animated cartoons, video games, television dramas, films and "idols" -- teenage singers and actors. As pop culture not only entertains but is also a reflection of society, the book is also about Japan itself -- its similarities and differences with the rest of the world, and how Japan is changing. The book features 32 pages of manga plus 50 additional photos, illustrations, and shorter comic samples.

Paradise Kiss Multilingual Matters 2038. The world has transformed from dream to nightmare. Gargoyle-like figures observe the streets from the rooftops. Many of the huge warehouses have become hotbeds for sinister beings, only possible in a perturbed mind or directly extracted from atavistic terrors. Ironically, New York remains the emblem of the world. Decimated of inhabitants, decrepit and ruinous metropolis, yet at the same time infected by new residents impossible to define in waging the final war. At the heart of this

fatal scenario: Luz, her sword Malefic, and lots of questions.

This book showcases recent developments in the field of Japanese applied linguistics. It covers a wide range of current issues and influential theoretical and methodological frameworks, many of which are of concern not only for Japanese specialists but also applied linguists in general. At the same time, the book provides empirical studies that exemplify how these issues and frameworks manifest themselves in contexts that surround first and second language speakers of Japanese. The book is divided into four sections. The first examines language in action, providing a close analysis of language as it is used in interactions between speakers. The second section

looks at sociological diversity in Japanese speakers, considering factors such as gender, age, or background. Section three explores how globalization has affected Japanese language use and acquisition. The final section reflects on classroom teaching of Japanese language and culture. This comprehensive, in-depth study will be useful for researchers and graduate students in both applied linguistics and Japanese linguistics.

Dead Moon depicts, like a flickering flame burning out, the fire between Moon and Mars, and its inevitable end. Their epilogue, full of fantastic illustrations, plunges into the bloody and remote story of Lovyang,

of its people, its tyrannical and opposed rulers, and the love-hate relationship between the protagonists of this legend.

A Modern Renaissance Environment Hansebooks

This book investigates the architectural, product design, and urban typology of the capsule which, beginning in the 1960s, broadened the concept of the basic building blocks of architecture to include a minimal living unit, called the "capsule." Here it is presented with regard to the continuity of the development of the Modern Movement, its revisionist criticism, pioneering examples, as well as contemporary examples and uses. The typology of the capsule allows us to consider this theme in terms of the architecture of resistance, with the potential to search for an "other" architecture that is embedded in our contemporaneity (manifested in small dwellings, composite structures, and container units; shelters and mobile

homes in nature and the urban environment; technology transfer in high-tech designs; devices, additions, and extensions etc.). The concept of the capsule as a building element of architecture, as well as a spatial element, can therefore be regarded as having a generative potential for an architecture of personal space for the individual, forcing us to reflect on our existing living and dwelling conditions.
