General Description. The
Shure SM57 unidirectional
dynamic microphone is
exceptional for musical
instrument pickup or for
vocals. With its bright, clean
sound and carefully
contoured presence rise, the
SM57 is ideal for live sound
reinforcement and
recording. It has an

extremely effective cardioid
pickup pattern which isolates
the main sound source while
minimizing background
noise.

Licensing of Shure wireless microphone equipment is the user's responsibility, and licensability depends on the user's classification and application, and on the selected frequency. Shure strongly urges the user to contact the appropriate telecommunications authority concerning proper licensing, and before choosing and ordering frequencies.

Invert and rotate the bracket. Slide it back onto the bolts over the brass and plastic

washers still on the microphone. The bracket should fit so the XLR connector faces the rear of the microphone, and the Shure logo on the back of the microphone is right-side up. Replace the brass sleeves. Be sure they are seated properly within the inner washers. *QLX-D User Guide - Shure* All AES67 configuration is managed in Dante Controller software.
