THE NEW YORK TIMES AND USA TODAY BESTSELLER! The secret to successful word-of-mouth marketing on the social web is easy: BE LIKEABLE. A friend's recommendation is more powerful than any advertisement. In the world of Facebook, Twitter, and beyond, that recommendation can travel farther and faster than ever before. Likeable Social Media helps you harness the power of word-of-mouth marketing to transform your business. Listen to your customers and prospects. Deliver value, excitement, and surprise. And most important, learn how to truly engage your customers and help them spread the word. Praise for Likeable Social Media: Dave Kerpen's insights and clear, how-to instructions on building brand popularity by truly engaging with customers on Facebook, Twitter, and the many other social media platforms are nothing short of brilliant. Jim McCann, founder of 1-800-FLOWERS.COM and Celebrations.com Alas, common sense is not so common. Dave takes you on a (sadly, much needed) guided tour of how to be human in a digital world. Seth Godin, author of *Poke the Box* Likeable Social Media cuts through the marketing jargon and technical detail to give you what you really need to make sense of this rapidly changing world of digital marketing and communications. Being human – being likeable – will get you far. Scott Monty, Global Digital Communications, Ford Motor Company Dave gives you what you need: Practical, specific how-to advice to get people talking about you. Andy Sernovitz, author of *Word of Mouth Marketing: How Smart Companies Get People Talking*

[Feasibility of a Consolidated Security Credential for Persons Who Transport Hazardous Materials](#) McGraw Hill Professional

The interwoven futures of humanity and our planet are under threat. Urgent action, taken together, is needed to change course and reimagine our futures.

Harrisons Manual of Medicine, 20th Edition Chicago Review Press

“One of the most vital and original novelists of her generation.”
—Larissa MacFarquhar, *The New Yorker* From the bestselling author of *Americanah* and *We Should All Be Feminists* Fifteen-year-old Kambili and her older brother Jaja lead a privileged life in Enugu, Nigeria. They live in a beautiful house, with a caring family, and attend an exclusive missionary school. They're

completely shielded from the troubles of the world. Yet, as Kambili reveals in her tender-voiced account, things are less perfect than they appear. Although her Papa is generous and well respected, he is fanatically religious and tyrannical at home—a home that is silent and suffocating. As the country begins to fall apart under a military coup, Kambili and Jaja are sent to their aunt, a university professor outside the city, where they discover a life beyond the confines of their father's authority. Books cram the shelves, curry and nutmeg permeate the air, and their cousins' laughter rings throughout the house. When they return home, tensions within the family escalate, and Kambili must find the strength to keep her loved ones together. *Purple Hibiscus* is an exquisite novel about the emotional turmoil of adolescence, the powerful bonds of family, and the bright promise of freedom.

The Diaries of Adam and Eve Transportation Research Board

This fact-filled guide explores forests from the equator to the frozen poles, the depths of the rainforest to the mountain forests at high altitudes. It also demonstrates the many benefits that forests provide us with, discusses the negative impacts that humans unfortunately have on forests and explains how good management can help protect and conserve forests and forest biodiversity. At the end of the guide, inspiring examples of youth-led initiatives and an easy-to-follow action plan will help young people develop their own forest conservation activities and projects.

[Purple Hibiscus](#) Butterworth-Heinemann

The ocean covers 70 percent of the Earth's surface, and is essential for life on our planet – even for those of us who live nowhere near the sea! It provides us all with food and other materials that we need, regulates our climate and provides half of the oxygen we breathe. The ocean also offers us various means of transport and opportunities for recreation. People have long thought that the ocean was so wide and bountiful that it would go on supplying our needs forever, but this is not the case: human activities are causing significant damage to life in the ocean. People are often unaware of the problems created by this heavy reliance, as few of us have the opportunity to look beneath the surface of the sea and see the damage that our actions have caused. This is where the Ocean Challenge Badge comes in: let it take you on a journey to discover the ocean! It is packed with activities to help you learn about how the ocean works, the creatures that live in it, and just how important it is in our everyday lives. You will also discover how YOU can play a role in protecting our ocean for future generations. We hope you will be inspired to take the challenge and celebrate our ocean. So dive in and begin

your aquatic discoveries!

History of Chicago Food & Agriculture Org.

Nick Ortner, founder of the Tapping World Summit and best-selling filmmaker of *The Tapping Solution*, is at the forefront of a new healing movement. In his upcoming book, *The Tapping Solution*, he gives readers everything they need to successfully start using the powerful practice of tapping – or Emotional Freedom Techniques (EFT). Tapping is one of the fastest and easiest ways to address both the emotional and physical problems that tend to hamper our lives. Using the energy meridians of the body, practitioners tap on specific points while focusing on particular negative emotions or physical sensations. The tapping helps calm the nervous system to restore the balance of energy in the body, and in turn rewire the brain to respond in healthy ways. This kind of conditioning can help rid practitioners of everything from chronic pain to phobias to addictions. Because of tapping's proven success in healing such a variety of problems, Ortner recommends to try it on any challenging issue. In *The Tapping Solution*, Ortner describes not only the history and science of tapping but also the practical applications. In a friendly voice, he lays out easy-to-use practices, diagrams, and worksheets that will teach readers, step-by-step, how to tap on a variety of issues. With chapters covering everything from the alleviation of pain to the encouragement of weight loss to fostering better relationships, Ortner opens readers' eyes to just how powerful this practice can be. Throughout the book, readers will see real-life stories of healing ranging from easing the pain of fibromyalgia to overcoming a fear of flying. The simple strategies Ortner outlines will help readers release their fears and clear the limiting beliefs that hold them back from creating the life they want.

The Ocean Challenge Badge Oxford University Press

Like sharks, epidemic diseases always lurk just beneath the surface. This fast-paced history of their effect on mankind prompts questions about the limits of scientific knowledge, the dangers of medical hubris, and how we should prepare as epidemics become ever more frequent. Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing catastrophic outbreaks of infectious disease. Yet, despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. From the Spanish flu and the 1924 outbreak of pneumonic plague in Los Angeles to the 1930 'parrot fever' pandemic and the more recent SARS, Ebola, and Zika epidemics, the last 100 years have been marked by a succession of unanticipated pandemic alarms. Like man-eating sharks, predatory pathogens are always present in nature, waiting to strike; when one is seemingly vanquished, others appear in its place. These pandemics remind us of the limits of scientific knowledge, as well as the role that human behaviour and technologies play in the emergence and spread of microbial diseases.

An airport emergency plan (AEP) is meant to support airports in defining roles and responsibilities of stakeholders during emergencies, identifying specific threats that could affect airports, and establishing for parallelism communication protocols for the airport community. The TRB Airport Cooperative Research Program's ACRP Synthesis 115: Practices in Airport Emergency Plans gathers relevant data specific to AEP practices that can effectively be applied to other airports, including general aviation airports, whether required to maintain an AEP or not.

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. All the authority of the most trusted brand in medical content in a convenient, portable guide Derived from most clinically salient content featured in Harrison's Principles of Internal Medicine, 20th Edition, this full color, portable guide covers all diseases and conditions commonly seen in general medical practice. This edition has been updated to reflect the latest clinical developments in medicine. Designed for quick access and employing an effective blend of concise text, bulleted key points, decision trees, and summary tables, the Manual makes it easy to find what you need at the point of care. The easy-to-navigate chapters use a standard repeating template and cover:

- Etiology and Epidemiology
- Clinically Relevant Pathophysiology
- Signs and Symptoms
- Differential Diagnosis
- Physical and Laboratory Findings
- Therapeutics
- Practice Guidelines, and more

Arrest-Proof Yourself UNESCO Publishing

'An extraordinary, deeply moving and astonishingly evocative story. Reading it, you feel you are in the Spitfire with him, at 20,000 feet, chased by a German Heinkel, with your ammunition gone' INDEPENDENT Two months before the outbreak of WWII, seventeen year old Geoffrey Wellum left school to become a fighter pilot with the RAF. He made it through basic training to become the youngest Spitfire pilot in the prestigious 92 Squadron. Thrust into combat almost immediately, Wellum found himself flying several sorties a day, caught up in terrifying dogfights with German Me 109s. Published more than fifty years afterwards, *FIRST LIGHT* is Geoffrey Wellum's gripping memoir of his experiences as a fighter pilot during WWII.

This booklet contains instructions and guidance relating to the arrest and detention of foreign nationals, deaths of foreign nationals, the appointment of guardians for minors or incompetent adults who are foreign nationals, and related issues pertaining to the provision of consular services to foreign nationals in the United States. This booklet is designed to help ensure that foreign governments can extend appropriate consular services to their nationals in the United States and that the United States complies with its legal obligations to such governments. The instructions and guidance herein should be followed by all federal, state, and local government officials, whether law enforcement, judicial, or other, insofar as they pertain to foreign nationals subject to such officials' authority or to matters within such officials' competence.

Practices in Airport Emergency Plans Hay House, Inc

Succession-nothing in plant, community, or ecosystem ecology has been so elaborated by terminology, so much reviewed, and yet so much the center of controversy. In a general sense, every ecologist uses the concept in teaching and research, but no two ecologists seem to have a unified concept of the details of succession. The word was used by Thoreau to describe, from a naturalist's point of view, the

general changes observed during the transition of an old field to a forest. As data accumulated, a lengthy taxonomy of succession developed around early twentieth century ecologists such as Cooper, Clements, and Gleason. Now, nearer the end of the century, and after much discussion concerning the nature of vegetation communities, where do ecologists stand with respect to knowledge of ecological succession? The intent of this book is not to rehash classic philosophies of succession that have emerged through the past several decades of study, but to provide a forum for ecologists to present their current research and present-day interpretation of data. To this end, we brought together a group of scientists currently studying terrestrial plant succession, who represent research experience in a broad spectrum of different ecosystem types. The results of that meeting led to this book, which presents to the reader a unique summary of contemporary research on forest succession.

Improving the Airport Customer Experience Laurel Leaf

The hormone cortisol, activated by the fight-or-flight (stress) response, is emerging as a major culprit in a variety of health problems. The Cortisol Connection explores the documented relationship between elevated levels of this hormone, chronic stress, and such health conditions as obesity, depression, suppressed immune system, osteoporosis, and hypertension. This new edition describes the results of the latest research about the connection between cortisol and HSD, and cortisol and testosterone.

The Youth Guide to Forests CRC Press

Soil is essential for life – it provides nutrients, water and minerals to plants and trees, and is home to millions of insects, bacteria and small animals. Without soil, we would not be able to grow any crops or other useful plants, support any livestock, or have materials for building shelter – soil really is a life-giver! Healthy soils also store and filter water, recycle nutrients and help us to deal with the negative effects of climate change by storing large amounts of carbon. But our soils are at risk; negative actions such as pollution and bad agricultural practices leave our soils exposed and damaged. We need healthy soils to support human well-being and a healthy planet. This is where the Soils Challenge Badge comes in: let it take you on a journey to discover the ground beneath your feet! This booklet is packed with activities to help you learn about soil and how it is formed, the creatures that live in it, and just how important it is in our everyday lives. You will also discover how YOU can play a role in protecting soils for future generations. We hope you will be inspired to take the challenge and celebrate our planet's soils. Dig in!

Removal of Disabled Aircraft Hunter House

"Good deal of fog this morning. I do not go out in the fog myself," notes Adam in his diary, adding, "The new creature does. It goes out in all weathers. And talks. It used to be so pleasant and quiet here." Adam has a lot to learn about Eve, and even more from her, as she names the animals, discovers fire, and introduces all manner of innovations to their garden home. Mark Twain's "translation" of the diaries of the first man and woman offers a humorous "he said/she said" narrative of biblical events. The great American storyteller found comfort and inspiration in the company of women, and his irreverent look at conventional religion is also a thoughtful -- and humorous -- argument for gender equality.

Consular Notification and Access DIANE Publishing

TRB's Hazardous Materials Cooperative Research Program (HMCRP) Report 6: Feasibility of a Consolidated Security Credential for Persons Who Transport Hazardous Materials discusses the

feasibility of consolidating several existing security credentials, which are necessary under current regulations and policies, into one credential for all transportation modes.

Threat, Risk, and Vulnerability Algonquin Books

The second edition of Practical Aviation Security is a complete guide to the aviation security system, from crucial historical events to the policies, policymakers, and major terrorist and criminal acts that have shaped the procedures in use today. The tip-of-the-spear technologies that are shaping the future are also addressed. This text equips readers in airport security or other aviation management roles with the knowledge to implement the effective security programs, to meet international guidelines, and to responsibly protect facilities or organizations of any size. Using case studies and practical security measures now in use at airports worldwide, readers learn the effective methods and the fundamental principles involved in designing and implementing a security system. The aviation security system is comprehensive and requires continual focus and attention to stay a step ahead of the next attack. Practical Aviation Security, Second Edition helps prepare practitioners to enter the industry, and helps seasoned professionals prepare for new threats and prevent new tragedies. Covers commercial airport security, general aviation and cargo operations, threats, and threat detection and response systems, as well as international security issues. Lays out the security fundamentals that can ensure the future of global travel and commerce. Applies real-world aviation experience to the task of anticipating and deflecting threats.
