While vampire stories have been part of popular culture since the beginning of the nineteenth century, it has been in recent decades that they have become a central part of American culture. *Vampire Legends in Contemporary American Culture* looks at how vampire stories -- from Bram Stoker's *Dracula* to *Blacula*, from Bela Lugosi's films to *Love at First Bite* -- have become part of our ongoing debate about what it means to be human. William Patrick Day looks at how writers and filmmakers as diverse as Anne Rice and Andy Warhol present the vampire as an archetype of human identity, as well as how many post-modern vampire stories reflect our fear and attraction to stories of addiction and violence. He argues that contemporary stories use the character of *Dracula* to explore modern values, and that stories of vampire slayers, such as the popular television series *Buffy the Vampire Slayer*, integrate current feminist ideas and the image of the Vietnam veteran into a new heroic version of the vampire story.

*Transformations of Sensibility* University Press of Kentucky

First published in Japan in 1983, this book is now a classic in modern Japanese literary studies.

Covering an astonishing range of texts from the Meiji period (1868–1912), it presents sophisticated analyses of the ways that experiments in literary language produced multiple new—and sometimes revolutionary—forms of sensibility and subjectivity.

Along the way, Kamei Hideo carries on an extended debate with Western theorists such as Saussure, Bakhtin, and Lotman, as well as with such contemporary Japanese critics as Karatani Kojin and Noguchi Takehiko. *Transformations of Sensibility* deliberately challenges conventional wisdom about the rise of modern literature in Japan and offers highly original close readings of works by such writers as Futabatei Shimei, Tsubouchi Shoyo, Higuchi Ichiyo, and Izumi Kyoka, as well

as writers previously ignored by most scholars. It also provides a new critical theorization of the relationship between language and sensibility, one that links the specificity of Meiji literature to broader concerns that transcend the field of Japanese literary studies. Available in English translation for the first time, it includes a new preface by the author and an introduction by the translation editor that explain the theoretical and historical contexts in which the work first appeared.

Robert Biel's Eurocentrism and the Communist Movement traces the history of Eurocentric--and anti-Eurocentric--currents in the Marxist-Leninist tradition, arguing that this distortion was key to the development and spread of revisionism, and ultimately to the failures of the communist project, in the 20th century. A work of intellectual history, Eurocentrism and the Communist Movement explores the relationship between Eurocentrism, alienation, and racism, while tracing the different ideas about imperialism, colonialism, "progress", and non-European peoples as they were grappled with by revolutionaries in both the colonized and colonizing nations. Teasing out racist errors and anti-racist insights within this history, Biel reveals a century-long struggle to assert the centrality of the most exploited within the struggle against capitalism. The roles of key figures in the Marxist-Leninist canon--Marx, Engels, Lenin, Stalin, Mao--within this struggle are explored, as are those of others whose work may be less familiar to some readers, such as Sultan Galiev, Lamine Senghor, Lin Biao, R.P. Dutt, Samir Amin, and others. In pursuit of the anti-racist and anti-colonial goal, Biel has made

an important contribution to understanding the development of Marxist thought in the 19th and 20th centuries, with strategic implications for our current revolutionary project.

Everything that you need to know about reading, making, and understanding comics can be found in a single Nancy strip by Ernie Bushmiller from August 8, 1959. Paul Karasik and Mark Newgarden's groundbreaking work *How to Read Nancy* ingeniously isolates the separate building blocks of the language of comics through the deconstruction of a single strip. No other book on comics has taken such a simple yet methodical approach to laying bare how the comics medium really works. No other book of any kind has taken a single work by any artist and minutely (and entertainingly) pulled it apart like this. *How to Read Nancy* is a completely new approach towards deep-reading art. In addition, *How to Read Nancy* is a thoroughly researched history of how comics are made, from their creation at the drawing board to their ultimate destination at the bookstore. Textbook, art book, monogram, dissection, *How to Read Nancy* is a game changer in understanding how the "simplest" drawings grab us and never leave. Perfect for students, academics, scholars, and casual fans.

Screenwriter Robert Riskin (1897-1955)

was a towering figure even among the giants of Hollywood's Golden Age. Known for his unique blend of humor and romance, wisecracking and idealism, Riskin teamed with director Frank Capra to produce some of his most memorable films. Pat McGilligan has collected six of the best Riskin scripts: *Platinum Blonde* (1931), *American Madness* (1932), *It Happened One Night* (1934), *Mr. Deeds Goes to Town* (1936), *Lost Horizon* (1937), and *Meet John Doe* (1941). All of them were directed by Capra, and although Capra's work has been amply chronicled and celebrated, Riskin's share in the collaboration has been overlooked since his death. McGilligan provides the "backstory" for the forgotten half of the team, indispensable counterpoint to the director's self-mythologizing autobiography--and incidentally the missing link in any study of Capra's career. Riskin's own career, although interrupted by patriotic duty and cut short by personal tragedy, produced as consistent, entertaining, thoughtful, and enduring a body of work as any Hollywood writer's. Those who know and love these vintage films will treasure these scripts. McGilligan's introduction offers new information and insights for fans, scholars, and general readers.
