The Fourth Account John Wiley & Sons

Once cultural and athletic competitors, Israel and Iran became sworn enemies after the 1979 Iranian Revolution. Although a tense coexistence held for over four decades, Israeli leaders understood that the fragile peace could crumble at any moment. The Mossad insisted that a contingency plan would be crucial for their country's continued survival. To that end, they devised a scheme that involved placing a deep-cover sleeper agent into the upper echelons of Iranian government and society. Renowned Iranian archeologist Ezekiel Darvish was the perfect mole. Born and raised in Tehran, he hadn't learned that he was a Jew until he was a teenager. But once he did, as a bon vivant and scholar, he moved seamlessly through Iranian academia and politics, clandestinely supplying the Mossad with telltale secrets needed to achieve their ultimate goal: a durable, permanent Middle East peace. Yet even Darvish is an unwitting pawn. Having been born out of wedlock, he never knew his father. But the moment that secret is uncovered, he understands that its revelation could either help him—or destroy him. With the aid of American confidants, Darvish struggles to keep out of Iranian crosshairs, until the mission is accomplished.

Based on over 45 years of research, BioGeometry Signatures are linear diagrams that help balance the subtle energy of body organs. The organ subtle energy patterns are accessed through BioGeometry Signatures placed externally in the body's energy fields to create a connection through Resonance of Shape. "This is a book that will change the way you think about your body and your health. It shows that we are not separate from the shapes, angles and proportions that surround us all the time, and that these shapes create energetic patterns that can introduce equilibrium and harmony into our own biological makeup. This is a modern science of energy balancing that provides the key to the hidden ancient knowledge of great civilizations. With BioGeometry, Dr. Ibrahim Karim has demonstrated how powerful simple shapes can be in altering the functioning of our physical, mental, and spiritual worlds. This has been frequently demonstrated in architectural and design projects, environmental balancing solutions including the mitigation of the effects of electro-pollution and geopathic stress, in health and wellness projects, and in the efforts of individuals in their personal spiritual development. In this book on BioGeometry Signatures, once again you see how powerful certain carefully created shapes can be in altering the physical functioning of organ systems, in supporting healing, and in changing physical and mental states. Work with them, let them touch you, and feel how they can assist you in your own search for harmony." Michael J.

From the Publishers Weekly review: "Two experts from Yale tackle the business wake-up-call du jour-environmental responsibility-from every angle in this thorough, earnest guidebook: pragmatically, passionately, financially and historically. Though "no company the authors know of is on a truly long-term sustainable course," Esty and Winston label the forward-thinking, green-friendly (or at least green-acquainted) companies WaveMakers and set out to assess honestly their path toward environmental responsibility, and its impact on a company's bottom line, customers, suppliers and reputation. Following the evolution of business attitudes toward environmental concerns, Esty and Winston offer a series of fascinating plays by corporations such as Wal-Mart, GE and Chiquita (Banana), the bad guys who made good, and the good guys-watchdogs and industry associations, mostly-working behind the scenes. A vast number of topics huddle beneath the umbrella of threats to the earth, and many get a thorough analysis here: from global warming to electronic waste "take-back" legislation to subsidizing sustainable seafood.
