Beavers are the great comeback story—a keystone species that survived ice ages, major droughts, the fur trade, urbanization and near extinction. Their ability to create and maintain aquatic habitats has endeared them to conservationists, but puts the beavers at odds with urban and industrial

expansion. These conflicts reflect a dichotomy within our national identity. We place environment and our concept of wilderness as a key touchstone for promotion and celebration, while devoting significant financial and personal resources to combating "the beaver problem." We need to rethink our approach to environmental conflict in general, and our approach to species-specific conflicts in particular. Our history often celebrates our integration of environment into our identity, but our actions often reveal an exploitation of environment and celebration of its subjugation. Why the conflict with the beaver? It is one of the few species that refuses to play by our rules and continues to modify environments to meet its own needs and the betterment of so many other species, while at the same time showing humans that complete dominion over nature is not necessarily

achievable.

To the Future, Ben Franklin! Knopf Books for Young Readers

Robinson Crusoe Robinson Crusoe is a novel by Daniel Defoe that was first published in 1719. Epistolary, confessional, and didactic in form, the book is a fictional autobiography of the title character—a castaway who spends 28 years on a remote tropical island near Trinidad, encountering cannibals, captives, and mutineers before being rescued. The story was perhaps influenced by Alexander Selkirk, a Scottish castaway who lived for four years on the Pacific island called "Mas a Tierra" (in 1966 its name was changed to Robinson Crusoe Island), Chile. The details of Crusoe's island were probably based on the Caribbean island of Tobago, since that island lies a short distance north of the Venezuelan coast near the mouth of the Orinoco river, in sight of Trinidad. It is also likely that Defoe was inspired by the Latin or English translations of Ibn Tufail's *Hayy ibn Yaqdhan*, an earlier novel also set on a desert island. Another source for Defoe's novel may have been Robert Knox's account of his abduction by the King of Ceylon in 1659 in "An Historical Account of the Island Ceylon," Glasgow: James MacLehose and Sons (Publishers to

the University), 1911. Although inspired by a real life event, it was the first notable work of literature where the story was independent of mythology, history, legends, or previous literature. -wikipedia

"A bold new voice in nature writing, from the front lines of Britain's rewilding movement Bringing Back the Beaver is farmer-turned-ecologist Derek Gow's inspirational and often riotously funny firsthand account of how the movement to rewild the British landscape with beavers has become the single most dramatic and subversive nature conservation act of the modern era. Since the early 1990s - in the face of outright opposition from government, landowning elites and even some conservation professionals - Gow has imported, quarantined and assisted the reestablishment of beavers in waterways across England and Scotland. In addition to detailing the ups and downs of rewilding beavers, Bringing Back the Beaver makes a passionate case as to why the return of one of nature's great problem solvers will be critical as part of a sustainable fix for flooding and future drought, whilst ensuring the creation of

essential lifescapes that enable the broadest possible spectrum of Britain's wildlife to thrive"--

The Legend of the Beaver's Tail The Sign Of The Beaver

Long ago Beaver did not look like he does now. Yes, he had two very large front teeth, but his tail was not wide and flat. It was thick with silky fur. Vain Beaver is inordinately proud of his glorious tail. When he's not bragging about his tail, Beaver spends his time grooming it, while the other woodland creatures go about their business of finding food and shelter for their families. Eventually Beaver's boasting drives away his friends and he is left on his own. But when his tail is flattened in an accident (of his own making), Beaver learns to value its new shape and

seeks to make amends with his friends. Based on an Ojibwe legend.

NATIONAL BESTSELLER • From the best-selling author of *The Dog Stars* comes the story of two college students on a wilderness canoe trip—a gripping tale of a friendship tested by fire, white water, and violence. "A fiery tour de force ... I could not put this book down. It truly was terrifying and unutterably beautiful."—The Denver Post Wynn and Jack have been best friends since college orientation, bonded by their shared love of mountains, books, and fishing. Wynn is a gentle giant, a Vermont kid never happier than when his feet are in the water. Jack is more rugged, raised on a ranch in Colorado where sleeping under the stars and cooking on a fire came as naturally to him as breathing. When they decide to canoe the Maskwa River in northern Canada, they anticipate long days of leisurely paddling and picking blueberries, and nights of stargazing and reading paperback Westerns. But a wildfire making its way across the

forest adds unexpected urgency to the journey. One night, with the fire advancing, they hear a man and woman arguing on the fog-shrouded riverbank; the next day, a man appears on the river, paddling alone. Is this the same man they heard? And if he is, where is the woman? From this charged beginning, master storyteller Peter Heller unspools a headlong, heart-pounding story of desperate wilderness survival.
