Using MATLAB, make plots of the signals below. Put your code in a Matlab script file so you can rerun it from the Matlab command after you

make revisions to your file. Use the subplot command to put several plots on the same page. Print out the plots and turn them in with your code. Use help subplot to find out how to use the command.

Signals And Systems Using Matlab
Taking advantage of the eigenfunction property of linear time-invariant (LTI) systems, the steady-state response of these systems to periodic signals is easily obtained.
MATLAB is used to represent and process periodic continuous-time signals.
