The Jeffrey Dahmer Story
Signature Killers
An unidentifiable body is

found in an Indianapolis park, deliberately arranged so that police know it's not just a random crime. Former cop Frank Behr, now a P.I. with no cases, no money and no options, finds himself chasing down the disappearance of a wayward young woman who's been missing for months in a futile attempt to collect a reward. With assistance from his few remaining contacts on the force, Behr follows the tenuous thread of his case into the

world of small-time prostitution-and discovers a possible connection to the body in the park. When another murder victim turns up, it's clear there's a serial killer at work, but this predator seems to be invisible, camouflaged by his perfectly normal-looking life. Behr's relentless quest for the missing girl and his parallel pursuit of the killer become entangled with the official police investigation. Ultimately, Behr's obsession with the truth

will lead him into the darkest places, and force him to make an unavoidable and devastating decision.

Anthropophagy - humans eating their fellow-humans - creates a curious blend of revulsion and fascination in the 'civilised' Western world. When the perpetrator is a murderer - most commonly a

sadistic serial killer - the crime not only shocks but it causes bewilderment. With this 2015 update of her comprehensive 1993 study of cannibalistic killers, Moira Martingale expands her original research about the making of such monsters. Cannibal Killers tracked the phenomenon from five hundred years ago with the notorious Sawney Bean to those whose names became a byword for horror as the twentieth century waned, such as Jeffrey Dahmer. In this updated version, we see

that in the twenty-first century cannibals who thirst for human flesh and blood are still around, and alarmingly, they have moved online.

"Do you think I killed those girls?"
Ted Bundy asked me this question after we had completed the final interview. We were standing in the corridor outside my office and Ted was about to return to his cell. It was an unusual question to ask... I was caught off guard by the question." "With this question, Ted had put me in a lose-lose situation. My best option might have been to tell him that I couldn't, or wouldn't, answer his

question. However, I said to him, "I don't know, but if you did, I believe you will do it again." I'm sure it wasn't what he wanted to hear. He didn't say anything. He turned and walked back to his cell. In future conversations we had together he never again asked that question." " ?Putting all the information I had gleaned from the test data as well as the phone conversations and the personal interviews with Ted? I concluded that it was my opinion that Ted's personality fit the crime for which he was found guilty. I submitted my report to the court. Then all hell broke loose." - from The 1976 Psychological Assessment of Ted Bundy Dr. Carlisle was part of the 90-Day Diagnostic team at the Utah State Prison tasked by the

judge to determine to the best of his ability, without being biased by any of the reports previously done, whether Ted Bundy had a violent personality. Many books have been written about Bundy, but rarely have we had the opportunity to understand the inner workings of his mind. Now, Dr. Carlisle shares the step-by-step psychological assessment process regarding how he determined that Bundy was indeed a violent person and would likely continue to kill if he was set free. This book contains never-before-seen interviews with Ted and those who knew him, along with some of Bundy's assessments, and a letter he wrote to Dr. Carlisle. Book four in the Development of the Violent Mind series.

This book will introduce the field of forensic semiotics as a tool for understanding crime and criminality. It will focus on how symbolism, ritual, and other sign-based activities play a crucial role in the constitution of criminal organizations and often in the enactment of individual crimes. It

will present semiotic notions, methods, and techniques that can be applied to forensic science, such as the role of ritual and slang in criminal gangs. *The Evil That Men Do* Simon and Schuster New York Times Bestseller and Winner of the Edgar Award: The definitive account of a serial killer's

rampage—and the manhunt that stopped him. On June 14, 1962, twenty-five-year-old Juris Slesers arrived at his mother's apartment to drive her to church. But there was no answer at the door. When he pushed his way inside, Juris found Anna Slesers dead on the kitchen floor, the cord of her housecoat

knotted tightly around her neck. Over the next two years, twelve more bodies were discovered in and around Boston: all women, all sexually assaulted, and all strangled. None of the victims exhibited any signs of struggle, nothing was stolen from their homes, and there were no signs of forcible entry. The police

could find no discernable motive or clues. Who was this madman? How was he entering women's homes? And what insanity was driving him? Drawn from hundreds of hours of personal interviews, as well as police, medical, and court documentation, this is a grisly, horrifying, and meticulously researched account

"Reflections on Green River" contains a more complete record of the communications between Ted Bundy and officials than has ever been previously published. Bundy's taped interviews, his letters from prison over the years 1984 to 1989, reveal his analytical mind in evaluating the Green River Killer and the insights he brought

in his own words, from a "unique perspective." They are presented in their original form to broaden the understanding of that period and were acquired through FOIA requests.

In 1991, flight attendant Nancy Ludwig checked in to an airport hotel near Detroit. The next morning she was found gagged, raped, and tortured-her throat slit with such rage that she was nearly decapitated. Her husband Arthur never gave up hope that the future would bring enough evidence to close the case. But it was the past that held the clue. In 1985, fifty-five-year old Margarette Eby, a music professor, met the same grisly death at her cottage in Flint, Michigan. The case went cold-until six years later when the victim's son Mark came upon the story of Nancy Ludwig's slaying. With nothing to go on but intuition, he called authorities, certain that the same fiend committed both crimes. A cunning sting operation yielded irrefutable DNA evidence, and authorities were led to the home of respected navy veteran Jeffrey Gorton living quietly with his wife and two children. But his cold-blooded secrets were only beginning to come to light, leaving fears that there were more victims yet to be found in a killing spree that had finally come to an

end. Blood Justice shows veteran reporter and author Tom Henderson at the top of his game.

A shocking case of unbridled sex, sadism, prostitution, date-rape drugs, abduction, bondage, torture, sexploitation, perverted fetishes, serial killing and dismemberment of the depraved New York notorious Ripper.

Historian and International Bestselling Author,

Peter Vronsky, describes his brief encounter with serial killer Cottingham in a seedy New York hotel in 1979 that later inspired him to write his bestseller history "Serial Killers: The Method and Madness of Monsters". In "Times Square Torso Ripper" Vronsky explores the history of the notorious Forty-Deuce strip on 42nd Street near Times Square and how it spawned the sadistic monster Richard Cottingham in an era before the term

"serial killer" had been coined in popular culture. Renowned serial homicide expert Dr. Robert D. Keppel said of Richard Cottingham, "I kept asking myself what it was that ultimately intrigued me about the Cottingham case. Partly it was the level of sadistic torture that Cottingham acted out on his victims. He didn't kill them and desecrate their bodies; he forced them to experience pain and humiliation before he killed them. Then he desecrated their

bodies." Includes 50
