Kimi's Obaachan, her grandmother, had always been a silent presence throughout her youth. Sipping tea by the fire, preparing sushi for the family, or indulgently listening to Ojichan's (grandfather's) stories for the thousandth time, Obaachan was a missing link to Kimi's Japanese heritage, something she had had a mixed relationship with all her life. Growing up in rural Pennsylvania, all Kimi ever wanted to do was fit in, spurning traditional Japanese culture and her grandfather's attempts to teach her the language. But there was one part of Obaachan's life that fascinated and haunted Kimi—her gentle yet proud Obaachan was once a prisoner, along with 112,000 Japanese Americans, for more than five years of her life. Obaachan never spoke of those years, and Kimi's own mother only spoke of it in whispers. It was a source of haji, or shame. But what really happened to Obaachan, then a young woman, and the thousands of other men, women, and children like her? From the turmoil, racism, and paranoia that sprang up after the bombing of Pearl Harbor, to the terrifying train ride to Heart Mountain, Silver Like Dust captures a vital chapter the Japanese-American experience through the journey of one remarkable

woman and the enduring bonds of family. *Work Gallery / Saga Press* Vols. for 1911-13 contain the Proceedings of the Helminothological Society of Washington, ISSN 0018-0120, 1st-15th meeting. *The Country Gentleman* Vintage "Like the druidic life force Jack taps, this hearty adventure, as personal as it is epic, will cradle readers in the 'hollow of its hand' (Booklist, starred review). Jack has caused an earthquake. He was trying to save his sister Lucy from being thrown down a well, but sometimes the magic doesn't quite work out. Not only does Jack demolish a monastery, but Lucy is carried off by the Lady of the Lake, and Jack has to follow her through the Hollow Road, which lies underground. Aided by Pega, a slave, and the berserker Thorgil, Jack encounters hobgoblins, kelpies, yarthkins, and elves—not the enchanted sprites one would expect, but fallen angels who steal human children for pets. In the eighth century, the world is caught between belief in the Old Gods and Christianity, and what Jack and his companions do will decide the fate of both religions. From National Book Award winner Nancy Farmer, this second book in the Sea of Trolls trilogy brilliantly enlarges the world of the first story. Look for the conclusion in The Islands of the Blessed. *TABITHA IN MOONLIGHT* Simon and Schuster Penny Jordan needs no introduction as arguably the most recognisable name writing for Mills & Boon. We have celebrated her wonderful writing with a special collection, many of which for the first time in eBook format and all available right now. The Mining Journal Routledge Originally published in 1983, this book presents both the technical and political information necessary to evaluate the emerging threat to world security posed by recent advances in uranium enrichment technology. Uranium enrichment has played a relatively quiet but important role in the history of efforts by a number of nations to acquire nuclear weapons and by a number of others to prevent the proliferation of nuclear weapons. For many years the uranium enrichment industry was dominated by a single method, gaseous diffusion, which was technically complex, extremely capital-intensive, and highly inefficient in its use of energy. As long as this remained true, only the richest and most technically advanced nations could afford to pursue the enrichment

route to weapon acquisition. But during the 1970s this situation changed dramatically. Several new and far more accessible enrichment techniques were developed, stimulated largely by the anticipation of a rapidly growing demand for enrichment services by the world-wide nuclear power industry. This proliferation of new techniques, coupled with the subsequent contraction of the commercial market for enriched uranium, has created a situation in which uranium enrichment technology might well become the most important contributor to further nuclear weapon proliferation. Some of the issues addressed in this book are: A technical analysis of the most important enrichment techniques in a form that is relevant to analysis of proliferation risks; A detailed projection of the world demand for uranium enrichment services; A summary and critique of present institutional non-proliferation arrangements in the world enrichment industry, and An identification of the states most likely to pursue the enrichment route to acquisition of nuclear weapons.

As insightful and wise today as it was when originally published in 1954, Jacques Ellul's *The Technological Society* has become a classic in its field, laying the groundwork for all other studies of technology and society that have followed. Ellul offers a penetrating analysis of our technological civilization, showing how technology—which began innocuously enough as a servant of humankind—threatens to overthrow humanity itself in its ongoing creation of an environment that meets its own ends. No conversation about the dangers of technology and its unavoidable effects on society can begin without a careful reading of this book. "A magnificent book . . . He goes through one human activity after another and shows how it has been technicized, rendered efficient, and diminished in the process."—Harper's "One of

the most important books of the second half of the twentieth-century. In it, Jacques Ellul convincingly demonstrates that technology, which we continue to conceptualize as the servant of man, will overthrow everything that prevents the internal logic of its development, including humanity itself—unless we take necessary steps to move human society out of the environment that 'technique' is creating to meet its own needs."—The Nation "A description of the way in which technology has become completely autonomous and is in the process of taking over the traditional values of every society without exception, subverting and suppressing these values to produce at last a monolithic world culture in which all non-technological difference and variety are mere appearance."—Los Angeles Free Press
