Simulation-based virtual labs and interactive chapters for ecology, evolution and genetics. We believe that students learn science by doing science. SimBio's modules engage students in the scientific process as they discover key concepts via experimentation using realistic simulations of biological systems.

[SimUText Order Inquiry | SimBio](#)

Over two decades ago, our EcoBeaker® ecology labs first revolutionized the teaching of ecology using simulated experiments. Now, over 100,000 students each year explore and learn basic and advanced ecological concepts using SimBio Virtual Labs and our new Interactive Chapters.

All of the modules listed below explore evolutionary topics. Most of the labs are built around classic study systems and work well both in place of traditional "wet" labs, or as homework assignments. Darwinian Snails, Sickle-Cell Alleles, Mendelian Pigs, and Evolutionary Evidence are particularly popular in introductory-level courses.

The tools below let you search the website to identify modules that can be included in college SimUText orders. College instructors are also encouraged to register for our free evaluation software that provides similar search tools as well as access to modules for review purposes.

[The 101 Collection | SimBio - SimBio Virtual Biology Labs ...](#)

This popular laboratory explores basic population biology concepts including exponential and logistic growth and carrying capacity. It is based on the textbook example of a predator-prey system involving wolves and moose on an island in Lake Superior. Students start out by characterizing the growth of a colonizing population of moose in the absence of predators.
