Plain & Simple: Solution-focused
Brief Coaching Essentials
The insurance industry does not want you to read this book. This book gives you knowledge from an insider. This knowledge will empower you to take simple steps that can protect your life's savings from long-term care expenses. In 2005, Congress passed legislation that gave each state the authority to develop "Long-Term Care Partnership Programs". These programs are a partnership between the federal government, your state government, select insurance companies, specially-

trained insurance agents, and you. These programs encourage the middle-class to purchase an amount of long-term care insurance that is equal to their net worth. If their policy runs out of benefits they can apply for Medicaid to pay for their care and all of their assets can be protected from Medicaid (both while they are alive and even after they pass away.) You can target how much long-term care insurance you need based upon how much of your assets you want to protect from Medicaid. If you want to protect more savings you can buy more benefits for a higher premium. If you have less savings you can buy less benefits for a lower premium. It's an equitable and affordable solution for those who want to plan ahead.

"Satisfying food for thought
on the ever-changing dynamics
of men and women as they
interact and go about their
individual lives" (Kirkus
Reviews) as cultural
commentator Stephen Marche
examines contemporary male-
female relations—with the
help of his wife, writer and
editor Sarah Fulford. One
morning in New York City,
Stephen Marche, then a new
father and tenure-track

professor, got the call: his
wife had been offered her
dream job...in Canada. Their
decision to prioritize her
career over his and move to
Toronto sheds new light on the
gender roles in their marriage
(and in the world around
them). As Marche provocatively
argues, we are no longer
engaged in a war of the sexes,
but rather stuck together in a
labyrinth of contradictions.
And that these contradictions
are keeping women from power
and confounding male identity.
The Unmade Bed is a deeply
researched, deeply personal

exploration into the moments in everyday life where women and men meet. After all, within offices and homes, on the street, online, and in bed, we constantly ask ourselves: What are we expected to sacrifice? Is it possible to be equal? As he attempts to answer these questions, Marche explores the issues that define our modern conversations on gender, from mansplaining and sexual morality to parenthood and divisions of the domestic sphere. In the process, he discovers that true power remains shockingly elusive for women while the idea of masculinity struggles in a state of uncertainty. The only way out of these mutual struggles is together. With footnote commentary throughout the book from Marche's wife, *The Unmade Bed* is a "compelling" (The Globe and Mail, Toronto), uniquely balanced, and honest approach to the revolution going on in our everyday lives—a thought-provoking work of social science that is sure to be a conversation starter.

DIY Financial Advisor: A Simple Solution to Build and Protect Your Wealth
DIY Financial Advisor is a synopsis of our research findings developed while serving as a consultant and asset manager for family offices. By way of background, a family office is a

company, or group of people, who manage the wealth a family has gained over generations. The term 'family office' has an element of cachet, and even mystique, because it is usually associated with the mega-wealthy. However, practically speaking, virtually any family that manages its investments— independent of the size of the investment pool—could be considered a family office. The difference is mainly semantic. DIY Financial Advisor outlines a step-by-step process through which investors can take control of their hard-earned wealth and manage their own family office. Our research indicates that what matters in investing are minimizing psychology traps and managing fees and taxes. These simple concepts apply to all families, not just the ultra-wealthy. But can—or should—we be managing our own wealth? Our natural inclination is to succumb to the challenge of portfolio management and let an 'expert' deal with the problem. For a variety of reasons we discuss in this book, we should resist the gut reaction to hire experts. We suggest that investors maintain direct control, or at least a thorough understanding, of how their hard-earned wealth is managed. Our book is meant to be an educational journey that slowly builds confidence in one's own ability to manage a portfolio. We end our book with a potential solution that could be applicable to a wide-variety of investors, from the

ultra-high net worth to middle class individuals, all of whom are focused on similar goals of preserving and growing their capital over time. DIY Financial Advisor is a unique resource. This book is the only comprehensive guide to implementing simple quantitative models that can beat the experts. And it comes at the perfect time, as the investment industry is undergoing a significant shift due in part to the use of automated investment strategies that do not require a financial advisor's involvement. DIY Financial Advisor is an essential text that guides you in making your money work for you—not for someone else!
