The economy uncertain, education in decline, cities under siege, crime and poverty spiraling upward, international relations roiling: we look to leaders for solutions, and when they don't deliver, we simply add their failure to our list of woes. In doing so, we do them and ourselves a grave disservice. We are indeed facing an unprecedented crisis of leadership, Ronald Heifetz avows, but it stems as much from our demands and expectations as from any leader's inability to meet them. His book gets at both of these problems, offering a practical approach to leadership for those who lead as well as those who look to them for answers. Fitting the theory and practice of leadership to our extraordinary times, the book promotes a new social contract, a revitalization of our civic life just when we most need it. Drawing on a dozen years of research among managers, officers, and politicians in the public realm and the private sector, among the nonprofits, and in teaching, Heifetz presents clear, concrete prescriptions for anyone who needs to take the lead in almost any situation, under almost any organizational conditions, no matter who is in charge. His strategy applies not only to people at the top but also to those who must lead without authority—activists as well as presidents, managers as well as workers on the front line.

The brain, with its nearly one hundred billion neurons, is the most complex structure in the universe, and we are living in a period of revolutionary advancements in neuroscience. Yet scientists and skeptics often frame these findings in ways that challenge the Christian worldview. Many professionals and popularizers claim that human beings are their brains, and that all human behavior and experience are merely by-products of brain physiology. In *The Brain, the Mind, and the Person Within*, professor of psychology Mark Cosgrove not only explains what the brain is and what it does but also corrects common misinterpretations and demonstrates that what we know about the brain coheres with the teachings of Scripture. He contends that humans are unities of soul and body in which both the spiritual and the physical interact. From this perspective, he presents informative overviews of contemporary debates about the brain, including consciousness, free will, "God spots," personhood, and life after death. The better we understand the brain, the better we understand ourselves and our exquisite design that reflects the wisdom of the Creator. Thoughtful readers will find this to be a fascinating, accessible survey of this unique part of the body and the profound theological and technological issues surrounding it.

Schools do amazing work to support children from disadvantaged backgrounds. But this book will enable them to do more. Disadvantage comes in many forms, but cultural poverty, where some students have relative knowledge gaps compared with their more affluent peers, can be addressed successfully by schools. *The Working Classroom* explores how working-class students are disadvantaged by a flawed system and what schools can do to close the gap. Written by two experienced authors with a deep understanding of the challenges that poverty and low aspiration can bring, and a passion for social justice, *The Working Classroom* examines how and why we must seek systemic changes. The book focuses on actions within the control of teachers and school leaders which will ensure that we create a socially just education system - one that builds on the rich heritage of the working-class, rather than seeing their background as a weakness. It offers practical ways for students and families to build on the best of working-class culture, whilst also empowering teachers, students and parents to change the system. *The Working Classroom* provides teachers with useful methods to improve the cultural capital of students from disadvantaged backgrounds that can be easily replicated and implemented in their own setting. Backed up by practical case studies that have a proven impact in schools with high levels of deprivation, this book will enable teachers to audit their current provision and encourage them to adopt new systems and practices so that they, and the wider school, will have a greater impact on the lives of working-class students and their families. Suitable for both teachers and leaders in a secondary school or sixth form college setting who seek to support social change in education and anyone in the corporate or non-education world who wants to practice effective altruism or philanthropy.
