Against the backdrop of World War II tragedy and devastation in Latvia, Poland and Germany and three decades of European history, this true narrative provides a window into the palpating heart of wartime upheaval through the lives of Rolf Dutzmann and Lilo Wassull—two people fatefully positioned "on the other side." In December of 1939, swept along on a tide of dire necessity and circumstance due to the imminent Soviet takeover of his homeland, Rolf, a young Latvian aeronautical engineering student, flees with his family to Germany, a country fully under Hitler's control and already engaged in a brutal war. While the account chronicles Rolf's pursuit of his technical dream against daunting wartime odds, it is first and foremost a poignant love story that plays out against a panorama of worldwide chaos and destruction. It is also a story of the seen and unseen forces that coalesce to keep Rolf and Lilo alive after they meet in 1940 Berlin, leading them through a chain of cataclysmic events including Rolf's draft into the Luftwaffe and his father's assignment as chief inspector of V-2 rocket production; the bombing of Berlin; the destruction of their homes; their numerous desperate, cross-country escapes from the bombing, the advancing Soviet troops from the east, and other Allied forces from the west; the POW camp hardships; and the deprivation of the postwar years. Despite the immeasurable evil, suffering and desolation of World War II, a synchronistic chain of events provides an uplifting reminder that love and hope may take wing even out of the ashes of life's most terrifying adversities.

Simple Solutions: For Planet Earth is a scientific book written in a popular style for the average reader. You have read about Peak Oil and Global Climate Warming, and complained about \$4/gallon gasoline, but how really serious are these headlines and annoyances? The author has worked his entire career on: the science, technology, education, administration and politics of these subjects, and crystallizes this complex field into understandable elements, providing simple solutions for humanity. Does it make sense for the renewable energy budget of the Federal Government to be about \$1 billion/year when: o Annual tax incentives and government programs for the oil industry are supposedly in the range between \$38 billion and \$115 billion, although Lester Brown says \$210 billion in 2005. o Farm subsidies alone in 2004 cost taxpayers \$16.2 billion. o Our country spends \$12 billion a month, or \$144 billion/year, on the Iraq and Afghanistan wars, ostensibly to protect oil, only to raise prices. The author's long experience with the Greenhouse Effect has led him to believe that methane, not carbon dioxide, could well be the critical gas of concern, for there is potential for global warming to cascade into, what he terms, the Venus Syndrome. The closing chapter speculates on a hypothesis regarding mega-tsunamis (100 meter waves) from landslides. While simple solutions are suggested, the problem is the inability of our civilization to agree on a workable strategy, which is further weakened by the lack of will on part of the general populace. Thus, the reader is urged to help make that crucial difference. Instructions and examples are provided on how to attain Rainbow Vision to carry out this mission for a better Planet Earth. The simplest solution is for everyone to join in on the effort.

The stories Popkin tells in this book offer important lessons not only for Chicago, but for the many other American cities still grappling with the legacy of racial segregation and failed federal housing policies, making this book a vital resource for city planners and managers, urban development professionals, and anti-poverty activists.

Book 1, SIMPLE SOLUTIONS for Planet Earth, dealt with energy and the environment. SIMPLE SOLUTIONS for Humanity provides ultimate answers for our society and beyond. Ever wonder if there could ever be a way to end crime and war forever, or the prospects for immortality, or a better educational system, or the reality of extraterrestrial intelligence, or the future of religion? If all the above can be satisfactorily resolved, then, just in case there is no afterlife, where is the best place to live on Earth today? Simple solutions, of course, are hardly that. How to end crime? What about three strikes and you're dead! Sure this should work, but it's not morally rational. The solution to war is incredibly simple. Just read the book and find out how. Scientists are getting very close to determining a way to disarm our aging gene. When will this happen? Our educational system is flawed. Be prepared to be shocked by the Stanford Marshmallow Study. Then find out that our terrible student scores relative to the developed world might not be worth all the anguish. The USA will prevail because of our superiority in... Could the solution for world peace or curing cancer be streaming in from space? The Search for Extraterrestrial Intelligence could someday soon detect what would be the most monumental discovery since the invention of God. How can religion overcome the immorality of purporting to promise an afterlife WITHOUT ANY PROOF? A Golden Evolution is suggested. Are you one of those who largely wasted your life looking out only for yourself, family and friends? Could there be a higher calling? You, too, can make a positive difference. Rainbow Vision is explained to equip you with the tools to help save Planet Earth and Humanity.
