This book uses Pierre Bourdieu ' s cultural capital model as a theoretical framework for exploring how students in Beijing and Hong Kong perceive parental influences—their parents ' cultural capital and support—on their participation in musical activities. By studying students ' perceptions of their parents ' cultural capital and support for their musical activities, this book revisits the applicability of Bourdieu ' s cultural capital model in the contemporary Chinese context and reveals how inequality in terms of parental cultural capital governs parents ' support and influences the intergenerational transmission of cultural capital, which in turn contributes to inequality in terms of students ' cultural capital.

There is increasing interest in understanding the interplay of emotional and cognitive processes. The objective of the Research Topic was to provide an interdisciplinary survey of cutting-edge neuroscientific research on the interaction and integration of emotion and cognition in the brain. The following original empirical reports, commentaries and theoretical reviews provide a comprehensive survey on recent advances in understanding how emotional and cognitive processes interact, how they are integrated in the brain, and what their implications for understanding the mind and its disorders are. These works encompasses a broad spectrum of populations and showcases a wide variety of paradigms, measures, analytic strategies, and conceptual approaches. The aim of the Topic was to begin to address several key questions about the interplay of cognitive and emotional processes in the brain, including: what is the impact of emotional states, anxiety and stress on various cognitive functions? How are emotion and cognition integrated in the brain? Do individual differences in affective dimensions of temperament and personality alter cognitive performance, and how is this realized in the brain? Are there individual differences that increase vulnerability to the impact of affect on cognition—who is vulnerable, and who resilient? How plastic is the interplay of cognition and emotion? Taken together, these works demonstrate that emotion and cognition are deeply interwoven in the fabric of the brain, suggesting that widely held beliefs about the key constituents of ' the emotional brain ' and ' the cognitive brain ' are fundamentally flawed. Developing a deeper understanding of the emotional-cognitive brain is important, not just for understanding the mind but also for elucidating the root causes of its many debilitating disorders.

Triple-Portrait traces over time a unique empathy with the voice of world-renowned countertenor James Bowman. First entranced by his May 1972 live performance of the Britten/Purcell realisation Sweeter Than Roses, the author later commissioned a Scena to mark his 50th birthday. A decade of creative contact followed, during which, James made his ecstatic music personal and even more beautiful, wrapping his listener in the dignity of Art.

In over fifteen years, the cultural and artistic response to 9/11 has been wide-ranging in form and function. As the turbulent post-9/11 years have unfolded – years that have been shaped and characterized by the War on Terror, the Patriot Act, the Wars in Afghanistan and Iraq, 7/7, Abu Ghraib and Guant á namo Bay – these texts have been commemorative and heroic, have attempted to work through collective and individual traumas, and have struggled with trying to represent the “ terrorist other. ” Many of these earlier domestic, heroic and traumatic works have so often been read as limitations in narrative. This collection, however, challenges the language of limitation and provides re-readings of earlier work, but also traces the emergence of a new paradigm for discussing the artistic responses to 9/11 – one that frames these narratives as dialogic, self-conscious and self-reflexive interventions in the responses to the attacks, the initial representations of the attacks, and the ever-shifting social and geopolitical continuities of the 9/11 decade. These texts widen the conversation about the lasting impacts of 9/11, and

incorporate strands of discussion on American exceptionalism and imperialism, torture, and otherness, whilst still remaining invested in the personal and collective traumas of the attacks. The authors included here ask crucial questions about the way 9/11 is being historicized: will it, for example, be read as a moment of rupture or epoch? Will it inevitably be attached to the War on Terror or the Wars in Iraq and Afghanistan? As they trace the emergent patterns of reflexivity, politicization and dissent, the contributions here are also implicitly invested in asking how far they extend.

Schwann-1, Record & Tape Guide

Essays on the history of bands in America from ca. 1820 to 1930, offering new insights on a major sphere of music making that brought diverse repertoires to wide audiences. The essays in this volume, written by leading scholars in the field of American-band history, examine a broad spectrum of issues, including biography, performance, repertoire, and marketing. Detailed studies of key turning points in the evolution of bands include P. S. Gilmore's 1864 New Orleans concerts, the Kaiser-Cornet-Quartett's 1872 tour, the 1892 transition from Gilmore's Band to Sousa's Band, C. G. Conn's lavish artist-endorsement posters, and the demise of the Sousa Band in the late 1920s. Additional essays seek to rectify oversights and add insights to the lives of key figures in band history.

African American keyed bugler Frank Johnson's earliest works receive close scrutiny, as does the life of neglected cornet superstar Alice Raymond. A complete re-evaluation of Francesco Fanciulli, the U. S. Marine Band leader whose reputation suffered greatly from an 1897 scandal, shows his importance in the realm of conducting and composition. The repertoire of a town band in antebellum New Hampshire and a documentary study of Civil War bandsmen seek to better understand social aspects of bands in the 1850s and 1860s.

Edited by Bryan Proksch and George Foreman.
