It's packed with photos, stories, and handy information, like how to date and troubleshoot your machine. It's a fun read for quilters, Featherweight owners, and history buffs.

The World of Yesterday Routledge

A hostage and a deep-sea scientist recall their romance in this "strange, intelligent, gorgeously written" novel about love, oceans, lust, and terror (New York Magazine). In a room with no windows on the coast of Africa, an Englishman, James More, is held captive by jihadist fighters. Posing as a water expert to report on al-Qaeda activity in the area, he now faces extreme privation, mock executions, and forced marches through the arid badlands of Somalia. Thousands of miles away on the Greenland Sea, Danielle Flinders, a biomathematician, prepares to dive in a submersible to the ocean floor. She is obsessed with life at the lowest strata of water. In this "masterly evocation of the intricacy of life," James and Danny are separately drawn back to the previous Christmas, to a French hotel on the Atlantic coast, where a chance encounter on the beach led to an intense and enduring romance (Teju Cole). For James, his mind escapes to utopias both imagined and remembered. Danny, meanwhile, is drawn back to beginnings: to mythical and scientific origins, and to her own. It is to each other and to the ocean that they most frequently return: magnetic and otherworldly, a comfort and a threat.

Pat Sloan's Teach Me to Machine Quilt Univ of California Press

This book brings together a wide range of sampling methods for investigating different arthropod groups. Each chapter is organised to describe and evaluate the main sampling methods (field methods, materials and supplies, sampling protocols, effort needed, and limitations); in addition, some chapters describe the specimen preparation and conservation, species identification, data collection and management (treatment, statistical analysis, interpretation), and ecological/conservation implications of arthropod communities. The book aims to be a reference for zoologists, entomologists, arachnologists, ecologists, students, researchers, and for those interested in arthropod science and biodiversity. We hope the book will contribute to advance knowledge on field assessments and conservation strategies. Arthropods represent the most speciose group of organisms on Earth, with a remarkable number of species and interactions still to be described. These invertebrates are recognized for playing key ecological roles in terrestrial, freshwater and marine ecosystems. Because of the

increasing and relentless threats arthropods are facing lately due to a multitude of human induced drivers, this book represents an important contribution to assess their biodiversity and role in ecosystem functioning and generation of ecosystem services worldwide.

Japanese Counterculture Back Bay Books

General Adams reflects on his experiences in the cold war, during which he served in both manned bombers and missile silos. He tells stories of famous and not-so-famous cold warriors, including some from the US Navy. Some stories are humorous; some stories are tragic. Having traveled extensively in Russia and some former Soviet Union states after retirement, General Adams tells us about his former adversaries, the Soviet cold warriors. In the process, he leaves no doubt about his respect for all who served so valiantly in the "strategic triad"-- the strategic command, the ICBM force, and the submarine Navy.

Songwriting For Dummies University of California Press

This spirited history of public television offers an insider's account of its topsy-turvy forty-year odyssey. James Day, a founder of San Francisco's KQED and a past president of New York's WNET, provides a vivid and often amusing behind-the-screens history. Day tells how a program producer, desperate to locate a family willing to live with television cameras for seven months, borrowed a dime—and a suggestion—from a blind date and telephoned the Louds of Santa Barbara. The result was the mesmerizing twelve-hour documentary *An American Family*. Day relates how Big Bird and his friends were created to spice up *Sesame Street* when test runs showed a flagging interest in the program's "live-action" segments. And he describes how Frieda Hennock, the first woman appointed to the FCC, overpowered the resistance of her male colleagues to lay the foundation for public television. Day identifies the particular forces that have shaped public television and produced a Byzantine bureaucracy kept on a leash by an untrusting Congress, with a fragmented leadership that lacks a clearly defined mission in today's multimedia environment. Day calls for a bold rethinking of public television's mission, advocating a system that is adequately funded, independent of government, and capable of countering commercial television's "lowest-common-denominator" approach with a full range of substantive programs, comedy as well as culture, entertainment as well as information. This title is part of UC Press's *Voices Revived* program, which commemorates University of California Press' s mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1995.

Successful sports coaching is as dependent on utilising good teaching and social practices as it is about expertise in sport skills and tactics. Understanding Sports Coaching offers an innovative introduction to the theory and practice of sports coaching, highlighting the social, cultural and pedagogical concepts underpinning good coaching practice. Now in a fully revised and updated second edition, the book explores the complex interplay between coach, athlete, coaching programme and social context, and encourages coaches to develop an open and reflective approach to their own coaching practice. It addresses key issues such as: power and the coach-athlete relationship viewing the athlete as a learner instructional methods and reflection how our view of ability informs assessment coaching philosophy and ethics. Understanding Sports Coaching also includes a full range of practical exercises and case studies designed to encourage coaches to reflect critically upon their own coaching strategies, their interpersonal skills and upon important issues in contemporary sports coaching. This book is essential reading for all students of sports coaching and for any professional coach looking to develop their coaching expertise.

Stefan Zweig (1881 – 1942) was a poet, novelist, and dramatist, but it was his biographies that expressed his full genius, recreating

for his international audience the Elizabethan age, the French Revolution, the great days of voyages and discoveries. In this autobiography he holds the mirror up to his own age, telling the story of a generation that "was loaded down with a burden of fate as was hardly any other in the course of history." Zweig attracted to himself the best minds and loftiest souls of his era: Freud, Yeats, Borgese, Pirandello, Gorky, Ravel, Joyce, Toscanini, Jane Addams, Anatole France, and Romain Rolland are but a few of the friends he writes about.

Sex And Personality Studies In Masculinity And Femininity Creative Publishing international

The Wrestler's Body tells the story of a way of life organized in terms of physical self-development. While Indian wrestlers are competitive athletes, they are also moral reformers whose conception of self and society is fundamentally somatic. Using the insights of anthropology, Joseph Alter writes an ethnography of the wrestler's physique that elucidates the somatic structure of the wrestler's identity and ideology. Young men in North India may choose to join an akhara, or gymnasium, where they subject themselves to a complex program of physical and moral fitness. Alter's first-hand description of each detail of the wrestler's regimen offers a unique perspective on South Asian culture and society. Wrestlers feel that moral reform of Indian national character is essential and advocate their way of life as an ideology of national health. Everyone is called on to become a wrestler and build collective strength through self-discipline.

Submergence Routledge

Lewis Madison Terman (1877-1956) was an American psychologist, noted as a pioneer in educational psychology in the early 20th century at the Stanford University School of Education. Sex differences in personality and temperament are matters of universal human interest. Among all classes of people, from the most ignorant to the most cultivated, they provide an inexhaustible theme for light conversation and humorous comment. They have always been and perhaps always will be one of the chief concerns of novelists, dramatists, and poets. They are rapidly coming to be recognized as one of the central problems in anthropology, sociology, and psychology.
