An inspirational guide for holistic family wellness, Sacred Medicine Cupboard presents seasonal insights, practical knowledge, recipes, projects, and journal prompts for a sacred medicine practice—broken down into 36 chapters. Beautifully designed, with an abundance of full-color photographs, this book

cultivates skills and tools for readers navigating an increasingly complicated world. Organized by topic of the week, such as Awakening, Blossom, Spicy, Glow, and Rest, Sacred Medicine Cupboard provides a treasury of tools—from medicinal teas and elixirs to sacred practices to creative projects—to nurture and rejuvenate the entire family, along with journaling spaces at the end of each section to write, reflect, and develop a way of life rooted in peace and natural health. Anni Daulter has teamed up with Jessica Booth and Jessica Smithson, who bring a wealth of knowledge and experience to the narrative. They share a commitment to encouraging mothers to practice their own skills, listen to their innate knowing, and explore redefining what health and wellbeing mean for their family. The practical tips and creative ideas presented here

put readers back in touch with simple time-tested practices that bring wholeness and wellbeing out of the cupboard. Medicine, they show, can be a well-timed hug, a reassuring hand, or a thoughtfully prepared meal. Echoing the core tenets of the Sacred Living Movement, this book reveals the power and insight we possess when our body, mind, and soul communicate in harmony.

This new Beginner Book about manic skiing squirrels—by J. Hamilton Ray with illustrations by Pascal Lemaitre—has the feeling of an old classic read-aloud. "Nobody knew how the mania grew. First there was one, and then there were two. Three more came gliding from under the trees. LOOK! On the hill. Those are squirrels on skis! Below lay the town, snow-covered and still. Not a sound could be heard. All was silent, until . . . Swwwishhhh swooped

the skiers, all dressed for play. Eighty-five squirrels and more on the way!" As you can imagine, the townsfolk are NOT amused. Can intrepid reporter Sally Sue Breeze find out where the squirrels are getting their skis-and make them stop skiing long enough to eat lunch-before pest-control guy Stanley Powers sucks them up in his vacuum device? (Don't worry—Sally triumphs in a most unexpected way.) With delightfully understated, funny illustrations by Pascal Lemaitre, this is the perfect book for beginning readers to curl up and chill out with on a snow day—or any day! Originally created by Dr. Seuss, Beginner Books encourage children to read all by themselves, with simple words and illustrations that give clues to their meaning. Most people know that there are 70 million Baby Boomers in America

today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month

left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their

investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

The second book in a romantic and drama-packed trilogy perfect for fans of Rachel Vincent, Julie Kagawa, and Alyson Noel.

Lusciously romantic and full of action-packed drama, readers will be swept away by this thrilling novel. Dawn Montgomery knows that monsters really do come out at night—after all, they are her job. It 's just after the thirty-year war between vampires and humans, and as an ambassador between the two sides (a role she inherited when her parents were killed), Dawn quickly learns that

balancing schoolwork, teen life, and the requests of Lord Valentine, the most frightening vampire in the region, isn't easy. There's nowhere left to hide. I thought vampires were our enemies—they controlled our lives, isolated our cities, and demanded our blood—until I met Victor. With Victor taking over as the new Lord Valentine, things were supposed to get better. Instead, they're worse than ever. Day Walkers, a new breed of vampires who can walk in the sun, are terrorizing the city. Blood supplies are low, and if Victor's vampires don't get enough, they will become infected with the Thirst—a disease that will turn them into mindless killers. To stop it, I must journey across the

desolate wasteland to the very place where the sickness began. I can only hope that the answers that await me are enough to save us all...before it's too late.

Bridging the gap between physics and astronomy textbooks, this book provides step-by-step physical and mathematical development of fundamental astrophysical processes underlying a wide range of phenomena in stellar, galactic, and

extragalactic astronomy. The book has been written for upper-level undergraduates and beginning graduate students, and its strong pedagogy ensures solid mastery of each process and application. It contains over 150 tutorial figures, numerous examples of astronomical measurements, and 201 exercises. Topics covered include the Kepler – Newton problem, stellar structure, binary evolution, radiation processes, special relativity in astronomy, radio propagation in the interstellar medium, and gravitational lensing. Applications presented include Jeans

length, Eddington luminosity, the cooling of the cosmic microwave background (CMB), the Sunyaev – Zeldovich effect, Doppler boosting in jets, and determinations of the Hubble constant. This text is a stepping stone to more specialized books and primary literature. Password-protected solutions to the exercises are available to instructors at www.cambridge.org/9780521846561. Books Original Hav is

like no place on earth.

Rumored to be the site
of Troy, captured during

the crusades and
recaptured by Saladin,

visited by Tolstoy,
Hitler, Grace Kelly, and

Princess Diana, this
Mediterranean city-state

is home to several
architectural marvels and

an annual rooftop race
that is a feat of
athleticism and insanity.

As Jan Morris guides us
through the corridors and
quarters of Hav, we hear
the mingling of Italian,
Russian, and Arabic in its
markets, delight in its
famous snow raspberries,
and meet the denizens of
its casinos and caf  s.

When Morris published
Last Letters from Hav in
1985, it was short-listed
for the Booker Prize.

Here it is joined by Hav
of the Myrmidons, a
sequel that brings the
story up-to-date. Twenty-
first-century Hav is
nearly unrecognizable.

Sanitized and monetized,
it is ruled by a group of
fanatics who have
rewritten its history to
reflect their own

blinkered view of the
past. Morris ' s only novel
is dazzlingly sui-generis,

part erudite travel
memoir, part speculative
fiction, part cautionary
political tale. It
transports the reader to
an extraordinary place
that never was, but could
well be.
