Maintaining Sustainable Accounting Systems in Small Business Heart Ally Books

This book analyses the making of the Chinese middle class that started in the 1990s using a constructivist approach. With the development of the Chinese economy, a new group of middle wage earners appeared. Chinese social scientists and state institutions promoted the idea that China needs a middle class to achieve modernization. Middle class members are defined—and define themselves—as good consumers, educated people, politically engaged but reasonable citizens. As such, the making of the middle class is the result of three convergent phenomena: an attempt to define the middle class, a process of civilization, and the development of protest movements. The making of the Chinese middle class, Rocca argues, is a way to end the stalemate that modern Chinese society is facing, in particular the necessity to democratize without introducing an election system.

Melding the fields of literature, sociology, and history, this book develops analyses of the ten novels in Balzac's *Scènes de la vie de province*. Following the order of the novels projected in *La Comédie humaine*, Allan H. Pasco investigates how Balzac used art as a tool of social inquiry to obtain startlingly accurate insights into the

relationships that defined his turbulent society. His repeated claim to be an "historian of manners" was more than an empty boast. Though Balzac was first and foremost a great novelist, he was also a trailblazing sociologist, joining Henri de Saint-Simon and the subsequent Auguste Comte in considering the relationships that represent society as an interacting, interlocking web. Using a methodology that combines close analysis with a broad cultural context, Pasco demonstrates that Balzac's sociological vision was extraordinarily pertinent to both his and our days.

The Past, Present, and Future of the Business School Springer

This book examines the criticism that modern business schools face and how these obstacles have evolved throughout history. Through historical, resource, and professional school contexts, it sheds light on the operating environment of the business school and the challenges endemic to various university-based professional schools, exploring the likelihood that potential interventions will result in success or failure. Business schools are often accused of inhibiting the practice of business by producing research that is irrelevant and does not address real concerns facing managers. This book investigates these accusations by outlining the historical values on which academic institutions are based, the resources and funding available today, and comparisons to other professional schools which undergo a similar level of scrutiny. This extensive coverage will help academics, administrators, faculty, and policy makers with the tools to understand better the ill-will towards business schools in today's university structure, and ultimately to deliver on the benefits they provide to stakeholders.

The Point of It All is a collection of poems grounded in the writer's experiential and vicarious experiences. To the poet, poems are designed to raise, respond and react to points that reach deep into the soul, because therein lies a person's innermost thoughts, emotions and instincts about right and wrong. This poet's vision reflects how deeply she feels about ideas and issues that force humans to question themselves and their behavior. Some of the poems although not intended to be didactic serve as reminders for everyone to be forever conscious of the embedded messages in society that might threaten their values and change their points of emphasis. She offers that it is imperative that everyone must use their voices, poetic or otherwise to forever remain true to their moral vision.

This book shows how our new-found ability to observe the Earth from “the necessary distance” has wide and profound cultural and ethical implications. First of all, it is the outcome of speculations and investigations of human beings in relation to their home planet carried out over millennia. In particular, it reveals a split between the ancient idea of the Earth as nurturing mother and the more recent conception of the Earth as a neutral resource able to be infinitely exploited by humankind. The 1968 Earthrise photograph, showing the beauty and fragility of the Earth, helped spark a worldwide environmental movement; now the comprehensive coverage of global change provided by satellites has the potential to convince us beyond reasonable doubt of the huge alterations being wrought upon the Earth and its climate system as a result of human actions, and of the need to act more responsibly.

The Christian community tends to operate under the assumption that the only women attending church are traditional stay-at-home moms. But in truth, more than 75% of mothers with school-age children work outside the home. *Chasing Superwoman* gives these working mothers what they’ve been craving—a funny, intelligent, relevant exploration of what it means to live out a vibrant faith amidst the many demands placed on their time and energy. *Chasing Superwoman* provides a much needed dialogue (not a formula) about the complex spiritual struggle of the working mother, plus a lot of laughter and encouragement for working women to embrace their busy life and trust God’s grace for getting it all done.

My name is Autumn Spring Winters. Right? What sane person names their kid after not only one season of the year, but three? Well, the last name was inherited, but still. Nobody ever said my mom was in her right mind, though. I often wonder what life would be like if she wasn’t a tweaker. But, you know, that’s just a daydream. Reality is she’s a meth addict. She’s been an addict for as long as I can remember. Sometimes I like to believe her when she says she’s clean. Sometimes, when she’s high, we get along great. Sometimes we even talk. When she’s coming down, though, it’s best to just hide. My name is Autumn Spring Winters and *Dream Smashers* is my story. It’s a love story, but most of all, it’s about letting go. Readers of Ellen Hopkins, Laurie Halse Anderson, Jay Asher and Leslie Connor will enjoy reading *Dream Smashers*.

In a land where light and dark are bastions of power, the Draska are healers and magicians of the Light. Elainya and her beloved Drenil serve in the court of King Cydril. But Cydril covets Elainya for his own. When the king threatens Drenil’s life, a mysterious traveler helps the couple escape. But not all helpful travelers can be trusted. Eighty years later, Elainya awakens as if from a restless night’s sleep. She is greeted by Nian, servant of the traveler-demon known as the Shadow Lord. Nian informs her that her beloved is dead, the kingdom at war, and the Draska destroyed by a plague that only she could have prevented. Caught between the powers of Shadow and Light, Elainya must find a way beyond her grief to defeat the demon, redeem the kingdom, and restore a magical race doomed by her own desperation.

This book offers a bold critical method for reading Gertrude Stein’s work on its own terms by forgoing conventional explanation and adopting Stein’s radical approach to meaning and knowledge. Inspired by the immanence of landscape, both of Provence where she travelled in the 1920s and the spatial relations of landscape painting, Stein presents a new model of meaning whereby making sense is an activity distributed in a text and across successive texts.

From love poetry, to plays and portraiture, Linda Voris offers close readings of Stein's most anthologized and less known writing in a case study of a new method of interpretation. By practicing Stein's innovative means of making sense, Voris reveals the excitement of her discoveries and the startling implications for knowledge, identity, and intimacy.

Between plans and their execution rage the winds of war. The winds of chance. The winds of choice. The winds of political ambition and human error--and human schemes. The winds of war grow dark around General George Meade, appointed to command the Army of the Potomac just three days before a brewing battle against Robert E. Lee, charismatic leader of the Confederate forces. No one--not even the outgoing commander--seems to know where Lee's army is, except that they are somewhere on Northern soil, possibly pushing toward a decisive battle deep in the heart of the Union. Bound by duty to take a position he did not seek and does not want, Meade reluctantly accepts Lincoln's appointment, and overnight, the fate of nearly 100,000 Union soldiers is in his hands. Meade is a planner--a quiet, capable engineer whose commitment to modesty and restraint is second only to his commitment to honor, duty, and country. While the winds of war swirl around him, he struggles to concoct a battle plan without even the most basic information, in order to defeat an enemy he cannot find, on ground he has not yet seen. Thwarted by insufficient military intelligence, and betrayed by the machinations of an unscrupulous general with dreams of glory, Meade knows it will take all his skill and the heroism of his troops to best the formidable and hitherto undefeated Lee. The fate of the Republic itself hangs in the balance. Without Warning is the gripping saga of the Battle of Gettysburg, the Union patriots who fought it, and the man who led them. It scrutinizes the role character plays in leadership and the challenge of the unexpected. Built firmly upon the annals of history, this epic historical novel brings to vivid life seven unforgettable days in the lives and trials of a Union general and his men as they brave the winds of war to save the United States of America.

Understand the importance of programming, even if you've never programmed before! This book will teach you the basics of programming using the Processing programming language. You will create your own Processing sketches, using personal images, themes, or hobbies that you enjoy. The chapters in the book will demonstrate the process of programming, starting with formulating an idea, planning, building on past projects, and refining the work, similar to writing an essay or composing a song. This approach will guide you to make use of logic and mathematics to produce beautiful

effects. The term for program in Processing is sketch, though the sketches featured in this book are far more than static drawings; they incorporate interaction, animation, video, audio, and accessing files on the local computer and on the Web. Technical features are introduced and explained in the context of complete examples: games (Snake, Hangman, jigsaw, slingshot), making a collage of family images and video clips, preparing directions for folding an origami model, rotating objects in 3D, and others. Programming is a fun, creative, expressive pursuit. It requires attention to details and can be frustrating, but there is very little that compares to the satisfaction of building a program out of nothing and making it work (or taking an existing program and fixing a problem, or adding a feature and making it better). Programming 101 is your gateway to making this happen. What You Will Learn Gain basic programming skills Build fun and creative programs Use files for making a holiday card Combine videos, images, and graphics in a Processing sketch Who This Book Is For Anyone who has been thinking about trying programming, or has tried, but needs more motivation; anyone who wants to learn about the Processing language.

The Beacon (Earth Haven: Book 2) Good Press

What if North Korea's sudden turn towards peace is a cunning act of misdirection? A routine Coast Guard inspection of a cargo ship in the Caribbean turns into a vicious firefight with unidentified Asian commandos. The second attempt to board the vessel ends with a nuclear detonation. North Korea has been smuggling short and intermediate-range missiles into Cuba. An unknown number of nuclear warheads are hidden less than 100 miles from the tip of Florida. Every American city east of San Antonio is in the target zone. Scrambling to stop the flow of weapons to Cuba, the president orders the Atlantic Fleet to surround the island, cutting off all access. It's the Cuban Missile Crisis all over again, but this time there won't be a diplomatic resolution. The North Koreans have developed a secret weapon that rips through the blockade with ease, leaving burning ships and floating bodies in its wake. Against this unimagined threat stand a small detachment of United States Marines and a cutting-edge destroyer that's never been tested in combat. It's a battle we never expected to fight, against an enemy we can barely comprehend...

By meshing psychology with literary analysis, this book inspires us to view the reading of fictional works as an emotional and seductive affair between reader and writer. Arguing that current teaching practices have contributed to the current decline in the study of literature, Jean-François Vernay's plea brings a refreshing perspective by seeking new directions and conceptual tools to highlight the value of literature. Interdisciplinary in focus and relevant to timely discussions of the vitality between emotion and literary studies, particularly within the contexts of psychology, affect studies, and cognitive studies, this book will open up a space in which the formation of our emotions can be openly examined and discussed.
