This book analyses the making of the Chinese middle class that started in the 1990s using a constructivist approach. With the development of the Chinese economy, a new group of middle wage earners appeared. Chinese social scientists and state institutions promoted the idea that China needs a middle class to achieve modernization. Middle class members are defined—and define themselves—as good consumers, educated people, politically engaged but reasonable citizens. As such, the making of the middle class is the result of three convergent phenomena: an attempt to define the middle class, a process of civilization, and the development of protest movements. The making of the Chinese middle class, Rocca argues, is a way to end the stalemate that modern Chinese society is facing, in particular the necessity to democratize without introducing an election system.

This book examines the criticism that modern business schools face and how these obstacles have evolved throughout history. Through historical, resource, and professional school contexts, it sheds light on the operating environment of the business school and the challenges endemic to various university-based professional schools, exploring the likelihood that potential interventions will result in success or failure. Business schools are often accused of inhibiting the practice of business by producing research that is irrelevant and does not address real concerns facing managers. This book investigates these accusations by outlining the historical values on which academic institutions are based, the resources and funding available today, and comparisons to other professional schools which undergo a similar level of scrutiny. This extensive coverage will help academics, administrators, faculty, and policy makers with the tools to understand better the ill-will towards business schools in today's university structure, and ultimately to deliver on the benefits they provide to stakeholders.

The Composition of Sense in Gertrude Stein's Landscape Writing Braveship Books

This book aims to explore what queer thinking and new materialist feminist thought might offer the field of sexuality education. It argues that queer theory in education might be queered further by drawing on feminist new materialism and extending itself to subjects beyond sexual and gender identities/issues, including a focus on 'things'. Allen explores how new materialism as a form of queer thinking, might be brought to bear on other important issues of social justice such as, classroom cultural and religious diversity.

One of the significant points of the Second Vatican Council is its emphasis on the status of the lay faithful in the church, which includes active participation in the life of faith. The council spoke of the active participation of all the faithful in liturgical celebrations on the basis of the common priesthood of the faithful, which is conferred during baptism and through which every believer shares in the priestly, kingly, and prophetic offices of Christ. In this book, Stella Nneji develops an ecclesiological, critical reflection on the teaching of the Second Vatican Council with regard to active participation. Focusing especially on the church as people of God, Nneji shows how the idea of participation is not merely a passive action but an active one. Based on the ecclesiological reflection on the church as people of God and its relevance for active participation, she maintains that Vatican II's vision on active participation is relevant to the upbuilding of the body of Christ (church). This vision integrates a critical thinking especially regarding those places where the implementation of Vatican II's teachings seems difficult.

The Christian community tends to operate under the assumption that the only women attending church are traditional stay-at-home moms. But in truth, more than 75% of mothers with school-age children work outside the home. Chasing Superwoman gives these working mothers what they've been craving—a funny, intelligent, relevant exploration of what it means to live out a vibrant faith amidst the many demands placed on their time and energy. Chasing Superwoman provides a much needed dialogue (not a formula) about the complex spiritual struggle of the working mother, plus a lot of laughter and encouragement for working women to embrace their busy life and trust God's grace for getting it all done.

Unspeakable Journey Apress

This book is an exposé on how America is responding to tumultuous activities since her founding. It has become obvious to most Americans that their nation has hit the crossroads of a paradigm of events. The author, on the other hand, as a member of this society began to study intensely what was going on and what effects people were going through when the standing president Barack Obama would say one thing and then do exactly the opposite through executive fiat. The stealing of documents by former Secretary of State Hillary Rodham Clinton, her use of her own personal server for the dispersal of departmental and top secret emails is astounding. Advanced knowledge of a terrorist attack is one thing; however, it remains a quagmire when both the secretary of state as well as the president concoct lies to trick and fool the American people. The crucial notion of the system of checks and balances on each branch of government is lost without US Constitutional oversight. Therefore, when one finds that the Internal Revenue Service or a former director of the FBI is found operating for another person's charitable foundation who just so happens to be running for the Office of the President is disastrous. America is not unlike any other nation on earth; however, when people are given the power to live above the law in a "rule of law" established and guaranteed in a nation, that is when someone needs to write a book about the discovery.

The Point of It All is a collection of poems grounded in the writer's experiential and vicarious experiences. To the poet, poems are designed to raise, respond and react to points that reach deep into the soul, because therein lies a person's innermost thoughts, emotions and instincts about right and wrong. This poet's vision reflects how deeply she feels about ideas and issues that force humans to question themselves and their behavior. Some of the poems although not intended to be didactic serve as reminders for everyone to be forever conscious of the embedded messages in society that might threaten their values and change their points of emphasis. She offers that it is imperative that everyone must use their voices, poetic or otherwise to forever remain true to their moral vision.

By meshing psychology with literary analysis, this book inspires us to view the reading of fictional works as an emotional and seductive affair between reader and writer. Arguing that current teaching practices have contributed to the current decline in the study of literature, Jean-François Vernay's plea brings a refreshing perspective by seeking new directions and conceptual tools to highlight the value of literature. Interdisciplinary in focus and relevant to timely discussions of the vitality between emotion and literary studies, particularly within the contexts of psychology, affect studies, and cognitive studies, this book will open up a space in which the formation of our emotions can be openly examined and discussed.

Melding the fields of literature, sociology, and history, this book develops analyses of the ten novels in Balzac's *Scènes de la vie de province*. Following the order of the novels projected in *La Comédie humaine*, Allan H. Pasco investigates how Balzac used art as a tool of social inquiry to obtain startlingly accurate insights into the relationships that defined his turbulent society. His repeated claim to be an "historian of manners" was more than an empty boast. Though Balzac was first and foremost a great novelist, he was also a trailblazing sociologist, joining Henri de Saint-Simon and the subsequent Auguste Comte in considering the relationships that represent society as an interacting, interlocking web. Using a methodology that combines close analysis with a broad cultural context, Pasco demonstrates that Balzac's sociological vision was extraordinarily pertinent to both his and our days.
