"The Program Evaluation Standards is a 'must-have' book for anyone responsible for reviewing evaluation proposals, planning and conducting evaluations, managing evaluation projects, or judging the merit and worth of evaluations once completed. For experienced practitioners, it provides a set of values and principles by which to guide successful practice, that is, a set of criteria that determines whether educational evaluations are trustworthy and fair. The Standards sets expectations of the design and implementation of educational evaluation for all practitioners in all types of educational arenas, even those involved in social programming endeavors. For newcomers and those less experienced who may be responsible for commissioning and using evaluations, the Standards supplies a useful framework of generating a list of questions to raise about any evaluation plan or final report in an effort to assess its pros and cons. The book is an invaluable 'how-to' resource for graduate students venturing out into the field, and it instills a sense of what it means to be a responsible evaluator. For clients or consumers, the book offers advice on what they should expect of an evaluation"--Publisher description.

Praise for Seeing Lessons "Tom Sullivan's inspiring story and the life lessons that he shares can help you live your own life with more passion, clarity, and meaning. I know you will find Seeing Lessons to be a great read."

-Jack Nicklaus "What makes this book stimulating is the feeling that the author is speaking with you, not at you. Soon you find yourself looking at commonplace things in a slightly different light. Before long you are relating his stories to your own stories--and seeing them with a new perspective and rekindled enthusiasm. Tom Sullivan's passion is contagious." -Betty White "With Seeing Lessons, Tom Sullivan is truly a gift that keeps on giving as he shares the joys, passions, frustrations, and even the pain of a life lived to the fullest--undaunted by challenges few of us can even imagine. I want my children to read this book, absorb its message, and pass it along to their children."

-former Senator Bill Brock "Seeing Lessons is an inspired book offering simple steps to improving your life and being the best person you can be. This is one book that will forever change the way you think about life and living." -Joseph J. Luciani, Ph.D. author of Self-Coaching "In Seeing Lessons, Tom Sullivan not only teaches me things about myself and about life I didn't know, but he offers possibilities for corporations to reach for the higher ground in the way they do business." -Peter Coors Chairman, Coors Brewing Company "This book not only teaches life lessons that are important to all of us but would prompt all of my players to be better athletes--and more important, better people." -Mike Shanahan Coach, Denver Broncos

"In this inspiring book, Tom Sullivan opens his heart and mind to all that blesses and surrounds him. You can do it too. Read this book." -Rosalene Glickman, Ph.D. author of Optimal Thinking: How to Be Your Best Self **Rail-highway Crossing Safety** Elsevier

The director of the American-Afghan war describes how he orchestrated the defeat of the Taliban in the region by forging separate alliances with warlords, Taliban dissidents, and the Pakistani intelligence service. **Essentials of Marketing Transportation Research Board** Communication in Health Organizations explores the communication processes, issues, and concepts that comprise the organization of health care, focusing on the interactions that influence the lives of patients, health professionals, and other members of health institutions. This book integrates scholarship from communication, medicine, nursing, public health, and allied health, to provide a comprehensive review of the research literature. The author explains the complexities and contingencies of communication in health settings using systems theory, an approach that enhances reader understanding of health organizing. The reader will gain greater familiarity with how health institutions function communicatively, and why the people who work in health professions interact as they do. The text provides multiple

opportunities to analyze communication occurring in health organizations and to apply communication skills to personal experiences. This knowledge may improve communication between patients, employees, or consumers. Understanding and applying the concepts discussed in this book can enhance communication in health organizations, which ultimately benefits health care delivery. Communication in Health Organizations offers students, researchers, and health practitioners a unique multi-disciplinary perspective that invites stimulating reflection, discussion, and application of communication issues affecting today's health system.

This comprehensive and authoritative guide offers an evidence-based overview of healing gardens and therapeutic landscapes from planning to post-occupancy evaluation. It provides general guidelines for designers and other stakeholders in a variety of projects, as well as patient-specific guidelines covering twelve categories ranging from burn patients, psychiatric patients, to hospice and Alzheimer's patients, among others. Sections on participatory design and funding offer valuable guidance to the entire team, not just designers, while a planting and maintenance chapter gives critical information to ensure that safety, longevity, and budgetary concerns are addressed.

"Since the publication of the first edition of the Access Management Manual, the context for transportation planning and roadway design in the United States has been transformed. Transportation agencies and local governments are under growing pressure to integrate land use and transportation policy and achieve a more sustainable, energy-efficient transportation system. This second edition of the manual responds to these developments by addressing access management comprehensively, as a critical part of network and land use planning. The content is interdisciplinary, with guidance pertinent to various levels of government as well as to pedestrians, bicyclists, and motorized vehicles, including trucks and buses, and is strongly grounded in decades of research, engineering science, and professional experience. Greater emphasis is placed on appropriate location of access, and guidance is refined to provide appropriate consideration of context and community issues. Substantial updates aid state and local agencies in managing access to corridor development effectively. Specific guidance on network and circulation planning and modal considerations is included, as well as guidance on effective site access and circulation design. A chapter on corridor management reinforces these concepts with a framework for application of access management in different contexts, along with appropriate strategies for each context. There are also new chapters on network planning, regional access management policies and programs, interchange area access management, auxiliary lane warrants and design, and right-of-way and access control. The manual concludes with an extensive menu of access management techniques and information on their application"--Provided by publisher.

This synthesis report will be of interest to department of transportation administrators and transportation planning, right-of-way, economic development, and environmental planning staffs, as well as to the consultants that work with them. It would also appeal to regional and local government officials and staff, as well as to the private sector. It summarizes information about corridor management policies and programs at the federal, state, and local levels. An effort was made to select a diversity of methods and programs for the broadest treatment of the subject. The synthesis focuses more on roadway corridors than on transit or greenway corridors, but much of the information provided is relevant to any corridor management effort. This report examines state policies and programs, techniques applied, and coordination issues. A series of case studies provides more detailed study. This report of the Transportation Research Board documents successful partnerships. It presents examples of transportation agencies working together, proactively, with local governments and other stakeholders to achieve more cost effective and

comprehensive solutions to transportation problems.

This report was prepared as part of the June 1994 Departmental Rail-Highway Crossing Safety Action Plan. Initiative V.B, Data and Research-Demographics, called for a study describing the circumstances under which fatal rail crossing crashes occur and characteristics of the drivers involved in such crashes. This report compares fatal motor vehicle rail crossing crashes with fatal crashes occurring at intersections and all fatal crashes. Data from NHTSA's Fatal Accident Reporting System, supplemented with information from Claritas, a commercially available geodemographic database, were used to provide the descriptive statistics.

It's never too late to say sorry..... A whispered family tragedy ripples across three generations in this coming of age mother and daughter memoir. Sylvia is dying and her daughter, a British expat living in Dubai, recalls her childhood and the confusing relationship she had with her mother. After Sylvia's death, she searches for explanations amongst her mother's possessions, prompting uncomfortable childhood memories and clues to her mother's sadness. The story moves back to London's Jewish East End in 1930, where Rose is expecting a baby. When the natural order is disrupted, and part of our personal history is erased, who do we become? Is Landscape . . . ? surveys multiple and myriad definitions of landscape. Rather than seeking a singular or essential understanding of the term, the collection postulates that landscape might be better read in relation to its cognate terms across expanded disciplinary and professional fields. The publication pursues the potential of multiple provisional working definitions of landscape to both disturb and develop received understandings of landscape architecture. These definitions distinguish between landscape as representational medium, academic discipline, and professional identity. Beginning with an inquiry into the origins of the term itself, Is Landscape . . . ? features essays by a dozen leading voices shaping the contemporary reading of landscape as architecture and beyond.

Up-To-Date Coverage of Every Aspect of Commercial Aviation Safety Completely revised edition to fully align with current U.S. and international regulations, this hands-on resource clearly explains the principles and practices of commercial aviation safety—from accident investigations to Safety Management Systems. **Commercial Aviation Safety, Sixth Edition**, delivers authoritative information on today's risk management on the ground and in the air. The book offers the latest procedures, flight technologies, and accident statistics. You will learn about new and evolving challenges, such as lasers, drones (unmanned aerial vehicles), cyberattacks, aircraft icing, and software bugs. Chapter outlines, review questions, and real-world incident examples are featured throughout. Coverage includes:

- ICAO, FAA, EPA, TSA, and OSHA regulations
- NTSB and ICAO accident investigation processes
- Recording and reporting of safety data
- U.S. and international aviation accident statistics
- Accident causation models
- The Human Factors Analysis and Classification System (HFACS)
- Crew Resource Management (CRM) and Threat and Error Management (TEM)
- Aviation Safety Reporting System (ASRS) and Flight Data Monitoring (FDM)
- Aircraft and air traffic control technologies and safety systems
- Airport safety, including runway incursions
- Aviation security, including the threats of intentional harm and terrorism
- International and U.S. Aviation Safety Management Systems

The need to understand how to design and set up an investigative experiment is nearly universal to all students in engineering, applied technology and science, as well as many of the social sciences. Many schools offer courses in this fundamental skill and this book is meant to offer an easily accessible introduction to the essential tools needed, including an understanding of logical processes, how to use measurement, the do's and don'ts of designing experiments so as to achieve reproducible results and the basic mathematical underpinnings of how data should be analyzed and interpreted. The subject is also taught as part of courses on Engineering statistics, Quality Control in Manufacturing, and Senior Design Project, in which conducting experimental research is usually integral to the project in question. * Covers such essential fundamentals as "definitions," "quantification," and standardization of test materials * Shows students and professionals alike how to plan an experiment—from how to frame a proper Hypothesis to designing an experiment to accurately reflect the nature of the problem to "designing with factors." * Includes a separate section on the use of Statistics in Experimental Research, including overview of probability and statistics, as well as Randomization, Replication and Sampling, as well as proper ways to draw statistical inferences from experimental data.

Locati Architects & Interiors was founded in 1989 by its principal, Jerry Locati, in Bozeman, Montana. With the belief that quality architectural design improves lives and brings people together, each project is an opportunity to create a gathering place, a community gateway and a connection to the landscape. With decades of experience in designing high-end residential, commercial, and resort architecture, and incorporating innovative products with classic style, Locati aspires to deliver architecture as a connective art form. The result is a body of work that is more than wood, stone, glass, and metal, more than a collection of structures: architecture as a means of connecting people to place. With the intention that every building should enhance the personal experience of the landscape, Locati designs dream homes throughout the Western United States, homes that bring both detail and definition to the natural world. Locati Architects approaches architecture with a clear philosophy: good design improves lives.
