Locati Architects & Interiors was founded in 1989 by its principal, Jerry Locati, in Bozeman, Montana. With the belief that quality architectural design improves lives and brings people together, each project is an opportunity to create a gathering place, a community gateway and a connection to the landscape. With decades of experience in designing high-end residential, commercial, and resort architecture, and incorporating innovative products with classic style, Locati aspires to deliver architecture as a connective art form. The result is a body of work that is more than wood, stone, glass, and metal, more than a collection of structures: architecture as a means of connecting people to place. With the intention that every building should enhance the personal experience of the landscape, Locati designs dream homes throughout the Western United States, homes that bring both detail and definition to the natural world. Locati Architects approaches architecture with a clear philosophy: good design improves lives.

This report was prepared as part of the June 1994 Departmental Rail-Highway Crossing Safety Action Plan. Initiative V.B, Data and Research-Demographics, called for a study describing the circumstances under which fatal rail crossing crashes occur and characteristics of the drivers involved in such crashes. This report compares fatal motor vehicle rail crossing crashes with fatal crashes occurring at intersections and all fatal crashes. Data from NHTSA's Fatal Accident Reporting System, supplemented with information from Claritas, a commercially available geodemographic database, were used to provide the descriptive statistics.

Since the monumental architecture of the Zimbabwe Plateau first became known to Westerners in the 16th century, speculation about the people that created it has been continuous and inventive. Tales of strongholds in the interior were taken home by the first Portuguese chroniclers of the Swahili coast, and their narratives became part of the geographic lore of the 17th and 18th centuries. In the mid-19th century, the lore was spun into fantastic and mysterious yarns about long-lost riches that lured adventurers and traders. Pikirayi (history, U. of Zimbabwe) aims to set the record straight by examining the growth of precolonial states on the plateau and adjacent regions, with a focus on the their historical and cultural development during the second millennium AD. c. This Action Plan presents a multi-faceted, multi-modal approach for improving safety at our nation's highway-rail crossings and for the prevention of trespassing on the rights-of-way of our nation's railroads. It is multi-faceted in that it presents enforcement, engineering, education, research, promotional and legislative initiatives addressing crossings of both light and conventional rail rights-of-way by public and private streets and highways. The objectives were to reduce the number of highway-rail crossing accidents and casualties while not impeding, but facilitating, the contribution potential of the highway and rail infrastructure on the nation's economy.

"The Program Evaluation Standards is a 'must-have' book for anyone responsible for reviewing evaluation proposals, planning and conducting evaluations, managing evaluation projects, or judging the merit and worth of evaluations once completed. For experienced practitioners, it provides a set of values and principles by which to guide successful practice, that is, a set of criteria that determines whether educational evaluations are trustworthy and fair. The Standards sets expectations of the design and implementation of educational evaluation for all practitioners in all types of educational arenas, even those involved in social programming endeavors. For newcomers and those less experienced who may be responsible for commissioning and using evaluations, the Standards supplies a useful framework of generating a list of questions to raise about any evaluation plan or final report in an effort to assess its pros and cons. The book is an invaluable 'how-to' resource for graduate students venturing out into the field, and it instills a sense of what it means to be a responsible evaluator. For clients or consumers, the book offers advice on what they should expect of an evaluation"--Publisher description.

The Discourse of Hospital Communication Springer

Communication in Health Organizations explores the communication processes, issues, and concepts that comprise the organization of health care, focusing on the interactions that influence the lives of patients, health professionals, and other members of health institutions. This book integrates scholarship from communication, medicine, nursing, public health, and allied health, to provide a comprehensive review of the research literature. The author explains the complexities and contingencies of communication in health settings using systems theory, an approach that enhances reader understanding of health organizing. The reader will gain greater familiarity with how health institutions function communicatively, and why the people who work in health professions interact as they do. The text provides multiple opportunities to analyze communication occurring in health organizations and to apply communication skills to personal experiences. This knowledge may improve communication between patients, employees, or consumers. Understanding and applying the concepts discussed in this book can enhance communication in health organizations, which ultimately benefits health care delivery. Communication in Health Organizations offers students, researchers, and health practitioners a unique multi-disciplinary perspective that invites stimulating reflection, discussion, and application of communication issues affecting today's health system.
