### Six Flags Physics Workbook

#### Answer

Six Flags Over Texas Page 6  
Physics Day

### ACCELERATION and ACCELEROMETERS

Accelerometers are designed to record the g forces felt by a passenger; they are calibrated in g's. A reading of 1g equals an acceleration of 9.8 m/s<sup>2</sup>. On Earth we normally experience 1g of acceleration vertically and

no g's laterally or longitudinally.

### Physics Workbook Six Flags

#### Answers

$g = mg$  where  $g$  = the acceleration factor and  $m$  is the mass of the person. To measure an

Acceleration Factor: The Acceleration Meter must be held in the direction of acceleration. If you are moving in a circle, the Acceleration Meter should be pointed so that it is pointed towards the center of the circle.
