This book provides a historical account of two Royal Commissions in Victorian Britain that sought solutions to river pollution problems attributed to industrial waste and town sewage. It describes and analyzes the legislative outcome, the Rivers Pollution Act of 1876, which remained the basic law until 1951. An introductory chapter and an epilogue place developments of the 1860's and 1870's

into the broader context of British history. The study dispels any notion that environmental issues are largely twentieth-century phenomena. Two themes recur in the general response to the work of the commissions: fear of the economic consequences of adopting anti-pollution measures and a stubborn attachment to local control.

A star science journalist with Parkinson's reveals the inner workings of this perplexing disease
Seven million people worldwide suffer from Parkinson's, and doctors, researchers, and patients continue to hunt for a cure. In *Brain Storms*, the award-

winning journalist Jon Palfreman tells their story, a story that became his own when he was diagnosed with the debilitating illness. Palfreman chronicles how scientists have worked to crack the mystery of what was once called the shaking palsy, from the earliest clinical descriptions of tremors, gait freezing, and micrographia to the cutting edge of neuroscience, and charts the victories and setbacks of a massive international effort to best the disease. He takes us back to the late 1950s and the discovery of L-dopa. He delves into a number of other therapeutic approaches to this perplexing condition, from partial lobotomies and deep brain stimulation to neural grafting. And he shares inspiring stories of brave individuals living with Parkinson's, from a former professional ballet dancer who tricks her body to move freely again to a patient who cannot walk but astounds doctors when he is able to ride a bicycle with

no trouble at all. With the baby boom generation beginning to retire and the population steadily aging, the race is on to discover a means to stop or reverse neurodegenerative conditions like Parkinson's and Alzheimer's. *Brain Storms* is the long-overdue, riveting, and deeply personal story of that race, and a passionate, insightful, and urgent look into the lives of those affected.

It's quite unlikely that Pierre Laclede and Auguste Chouteau could have comprehended the scope of their undertaking in 1764 when they laid out the settlement on the western banks of the Mississippi that was to become the metropolis of St. Louis. Founded by the French, governed by the Spanish, and heavily populated by the English and Germans, the role that the Irish had in making St. Louis what it is today is often overlooked. The Irish are steeped in tradition, and that trait did not leave the Irish immigrants when they arrived in St. Louis and called this place home. Like many other cities in America, the heritage of Ireland is alive and well in St. Louis. This book visually captures their Irish spirit, and portrays a few of the Irish "movers and shakers" alongside the "Irish commoner" in their new and challenging lives here in St. Louis.

An illuminating biography of the man who taught Americans "how to win friends and influence people" Before Stephen Covey, Oprah Winfrey, and Malcolm Gladwell there was Dale Carnegie. His book, *How to Win Friends and Influence People*, became a best seller worldwide, and *Life* magazine named him one of "the most important Americans of the twentieth century." This is the first full-scale biography of this influential figure. Dale Carnegie was born in rural Missouri, his father a poor farmer, his mother a successful preacher. To make ends meet he tried his hand at various sales jobs, and his failure to convince his customers to buy what he had to offer eventually became the fuel behind his future glory. Carnegie quickly figured out that something was amiss in American education and in the ways businesspeople related to each other. What he discovered was as simple as it was profound: Understanding people's needs and desires is paramount in any successful enterprise. Carnegie conceived his book to help people learn to relate to one another and enrich their lives through effective communication. His success was extraordinary, so hungry was 1920s America for a little psychological insight that was

easy to apply to everyday affairs. *Self-help Messiah* tells the story of Carnegie's personal journey and how it gave rise to the movement of self-help and personal reinvention.

"Tolstaya's essays in this compact, historically significant volume offer a fascinating, highly intelligent analysis of Russian society and politics" (Publishers Weekly). These twenty essays address the politics, culture, and literature of Russia with both flair and erudition.

Passionate and opinionated, often funny, and using ample material from daily life to underline their ideas and observations, Tatyana Tolstaya's pieces range across a variety of subjects. They move in one unique voice from Soviet women, classical Russian cooking, and the bliss of snow to the effect of Pushkin and freedom on Russia writers; from the death of the tsar and the Great Terror to the changes brought by Gorbachev, Yeltsin, and Putin in the last decade. Throughout this engaging volume, the Russian temperament comes into high relief. Whether

addressing literature or reporting on politics, Tolstaya's writing conveys a deep knowledge of her country and countrymen. Pushkin's Children is a book for anyone interested in the Russian soul. "Tolstaya is simply the most fearless female observer of the very male-centric culture . . . of the USSR." —Ben Dickinson, Publishing

In 1927, on the northeast corner of Cherokee and Iowa Streets in south St. Louis, a multistory, multipurpose building was erected. Retail shops and a bowling alley occupied the first floor, while upstairs was a place that defied the imagination of someone driving by in their brand new Model T Ford. Today, that upstairs space, with its lofty ceiling, huge maple tongue-in-groove dance floor, and wraparound balcony, is the Casa Loma Ballroom -- St. Louis' last grand ballroom. Today, one gets the feeling that the ghosts of the big bands and the vocalists still linger there --

and with good reason. Just about everybody who was anybody played there at one time or another. Ol' Blue Eyes himself, before he was the idol of millions, received just a meager "Featured Singer, Frank Sinatra" note at the bottom of the Casa Loma bill the night he played with the Harry James Orchestra.

A classic work of nature and humanity, by renowned writer Peter Matthiessen (1927-2014), author of the National Book Award-winning *The Snow Leopard* and the new novel *In Paradise* Peter Matthiessen crisscrossed 20,000 miles of the South American wilderness, from

the Amazon rain forests to Machu Picchu, high in the Andes, down to Tierra del Fuego and back. He followed the trails of old explorers, encountered river bandits, wild tribesmen, and the evidence of ancient ruins, and discovered fossils in the depths of the Peruvian jungle. Filled with observations and descriptions of the people and the fading wildlife of this vast world to the south, *The Cloud Forest* is his incisive, wry report of his expedition into some of the last and most exotic wild terrains in the world. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Yet, as consumers we have become insensitive to most advertising. We easily forget

brands and may switch to another product on a whim. There are ways for brands to break this cycle. Brands that succeed are the ones that help us find meaning. In this process, the brands become meaningful in and of themselves. *Brand Hacks* takes you on an exploratory journey, revealing why most advertising campaigns fail and examining the personal, social, and cultural meanings that successful brands bring to consumers' everyday lives. Most importantly, this book will show you how to use simple brand hacks to create and grow brands that deliver meaning even with a limited budget. *Brand Hacks* is supported by in-depth research in consumer psychology, interviews with industry-leading marketers, and case studies of meaningful brands, both big and small.

Standard Directory of Advertising Agencies Macmillan + ORM Returning to his longtime home in Japan after his father-in-law's sudden death, Pico Iyer picks up the steady patterns of his everyday rites: going to the post office and engaging in furious games of ping-pong every evening. But in a country whose calendar is

marked with occasions honoring the dead, he comes to reflect on changelessness in ways that anyone can relate to: parents age, children scatter, and Iyer and his wife turn to whatever can sustain them as everything falls away. As the maple leaves begin to turn and the heat begins to soften, Iyer shows us a Japan we have seldom seen before, where the transparent and the mysterious are held in a delicate balance, and where autumn reminds us to take nothing for granted.

Experiments with Fertilizers

Other Press, LLC

A collection of highly personal and poetic essays about life, literature, and politics by the renowned German writer, Jenny Erpenbeck. Jenny Erpenbeck's highly acclaimed novel *Go, Went, Gone* was a *New York Times* notable book and launched one of Germany's most admired writers into the American spotlight. In the *New Yorker*, James Wood wrote: "When Erpenbeck wins the Nobel Prize in a few years, I suspect that this novel will be cited." On the heels of this literary breakthrough comes *Experiments with Fertilizers*, a book of personal, profound, often humorous meditations and reflections. Erpenbeck writes, "With this collection of texts, I am looking back for the first time at many years of my life, at the thoughts that filled my life from day to day." Starting with her childhood days in East Berlin ("I start with

my life as a schoolgirl ... my own conscious life begins at the same time as the socialist life of Leipziger Strasse"), *Not a Novel* provides a glimpse of growing up in the GDR and of what it was like to be twenty-two when the wall collapsed; it takes us through Erpenbeck's early adult years, working in a bakery after immersing herself in the worlds of music, theater, and opera, and ultimately discovering her path as a writer. There are lively essays about her literary influences (Thomas Bernhard, the Brothers Grimm, Kafka, and Thomas Mann), unforgettable reflections on the forces at work in her novels (including history, silence, and time), and scathing commentaries on the dire situation of America and Europe today. "Why do we still hear laments for the Germans who died attempting to flee over the wall, but almost none for the countless refugees who have drowned in the Mediterranean in recent years, turning the sea into a giant grave?" With deep insight and warm intelligence, Jenny Erpenbeck provides us with a collection of unforgettable essays that take us into the heart and mind of "one of the finest and most exciting writers alive" (Michel Faber).

Black Lives and Spatial Matters is a call to reconsider the epistemic violence that is committed when scholars, policymakers, and the general public continue to frame Black precarity as just

another racial, cultural, or ethnic conflict that can be solved solely through legal, political, or economic means. Jodi Rios argues that the historical and material production of blackness-as-risk is foundational to the historical and material construction of our society and certainly foundational to the construction and experience of metropolitan space. She also considers how an ethics of lived blackness—living fully and visibly in the face of forces intended to dehumanize and erase—can create a powerful counterpoint to blackness-as-risk. Using a transdisciplinary methodology, *Black Lives and Spatial Matters* studies cultural, institutional, and spatial politics of race in North St. Louis County, Missouri, as a set of practices that are intimately connected to each other and to global histories of race and race-making. As such, the book adds important insight into the racialization of metropolitan space and people in the United States. The arguments presented in this book draw from fifteen years of engaged research in North St. Louis County and rely on multiple disciplinary perspectives and local

knowledge in order to study
relationships between
interconnected practices and
phenomena.
