Trade paperbacks, a pretty loose category of books, are often in the 5-1/2? x

---

8-1/2" to 6" x 9" range. This page proportion—for instance in the 6" x 9" size—of 2:3 has long been considered an ideal for a book page, and you can create good looking books at different sizes but in the same page proportions.

Self-Publishing Basics: How to Pick the Size of your Book

The size and proportions of a book will thus

depend on the size of the original sheet of paper used in producing the book. For example, if a sheet 19 inches (480 mm) by 25 inches (640 mm) is used to print a quarto, the resulting book will be approximately 12 1/2 inches (320 mm) tall and 9 1/2 inches (240 mm) wide, before trimming. Because the size of paper

used has differed over the years and localities, the sizes of books of the same format will also differ. **Book size - Wikipedia** Today we will format a B-Format book at 198mm high x 129mm wide. This is a standard size for a novel. If you are struggling to find a page size that you think is suitable for your book, then head over to our other post for more
