Additionally, a number of personal stories are included in the introductory sections of several chapters. All of these personal stories are true; most were written by the individual who experienced the events described, and they generally put a more personal "spin" on the disorders described. Each chapter has clearly written lab activities, including step by step instructions, diagrams, and background content needed to allow students to fully understand the concepts explored in lab. Activities encourage hands-on exploration and active learning. The book is loaded with full color art and each chapter includes integrated tear out pre-lab activities to help students prepare for lab, as well as review pages to be completed after lab.
