"SketchUp is software designed to accommodate your personal design process. (Too often it is your process that must accommodate software.)

Start with massing and loose proportions, and then add detail as you go. Or, if you need to draw more accurately, SketchUp can accept exact dimensions or exchange precision data with industry standard CAD systems at any time. Unlike CAD, you can approach design problems at the level of abstraction that is appropriate to your design goals, even as they change throughout a project." - page 8.
