The most important thing to  
consider when buying a ski setup  
for your child is getting the right  
size. While it might be tempting to  
buy a ski that they can grow into, a  
ski that ' s too big will be hard for  
them to turn and control, while a  
properly sized ski will be easier for  
them turn and ultimately enjoy and  
learn on.

Most of the time when buying used  
it is likely the binding will already  
be attached to a ski. Bringing your  
boot can also help you see if a  
remount (moving the position of  
heel or toe of the binding) will be  
needed. If you are buying demos  
from your local store, skis will have  
demo bindings and can be adjusted  
to fit most sizes.

mindset of where you ski the most  
and the conditions/terrain it  
provides on a regular basis. People  
will often buy a pair of skis for that  
one vacation over Christmas break,  
but when in reality they end up  
skiing at a different resort closer to  
home the majority of the winter.
