The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

This collection brings together global perspectives which critically examine the ways in which language as a resource is used and managed in myriad ways in various blue-collar workplace settings in today's globalized economy. In focusing on blue-collar work environments, the book sheds further light on the informal processes through which top down language policies take place in different multilingual settings and the resultant asymmetrical power relations which emerge among employees and employers in such settings. Taking into account the latest debates on poststructuralist theories of language, the volume also extends its conceptualization of language to demonstrate the ways in which it extends to a wider range of multilingual and multimodal resources and communicative practices, all of which combine in unique and different ways toward constructing meaning in the workplace. The volume's unique focus on such workplaces also showcases domains of work which have generally until now been less visible within existing research on language in the workplace and the subsequent methodological challenges that arise from studying them. Integrating a range of theoretical and methodological approaches, along with empirical data from a diverse range of blue-collar workplaces, this book will be of particular interest to students and researchers in critical sociolinguistics, applied linguistics, sociology, and linguistic anthropology.
