Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

The Golden Age of snowmobile manufacturing was from 1968-1976 with a gradual slow down leading to 1982.

During this time literally hundreds of snowmobile manufacturers sprung up and then disappeared. This book is a look

at all the most interesting, rare, or collectible snowmobiles from that time period. The big names like Arctic Cat, Polaris, Ski-Doo, Yamaha, John Deere, Scorpion, Snow-Jet, Mercury, Rupp, Moto-Ski, to the many small-company brands like Allied, Boa Ski, Chaparral, Evinrude, Harley Davidson, Johnson, Polaron, Sears, Skiroule, Sno Prince, Viking, and even includes a chapter of collectible racing snowmobiles in the hobby, like the 1977 Arctic Cat Z that turned Arctic Cats racing program around, and treasures like a 1973 Chaparral grass drag sled or a 1974 Roll-O-Flex called The Wild One. This book would be a benefit to anyone interested in sleds from this time period or looking to buy a more collectible sled from this era.

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.
