Infusion Nursing Aspen Publishers

Gain the nursing skills you need to provide wellness-based care for older adults! Ebersole and Hess' *Gerontological Nursing & Healthy Aging*, 6th Edition uses a holistic approach to describe compassionate care along a continuum of wellness. Designed to promote healthy aging regardless of the patient's situation or disorder, this text provides best-practice guidelines in covering physical, psychosocial, spiritual, and cognitive health. New to this edition are Next Generation NCLEX®-style case studies, updates on measuring clinical judgment, expanded coverage of core competencies, and more. Written by gerontological nursing experts Theris Touhy and Kathleen Jett, this concise text provides a solid foundation in every aspect of healthy aging. Focus on health and wellness provides the evidence-based information and strategies needed to promote healthy aging. Key concepts, learning activities, and discussion questions in every chapter emphasize the information needed to enhance care. Recommended competencies from the AACN and the Hartford Institute for Geriatric Nursing are integrated throughout. Discussion of disease processes is placed in the context of healthy adaptation, nursing support, and responsibilities. Easy-to-use information on nursing techniques and communication appears with the associated disorders, symptoms, and situations. Tips for Best Practice and Resources for Best Practice boxes provide insight into proven methods of nursing care. Discussions of nursing and interprofessional actions help students learn to enhance wellness, maintain optimal function, and prevent unnecessary disability. Coverage of age, cultural, racial, and gender differences highlights these important considerations in caring for older adults. NEW! Updates reflect the NCSBN Clinical Judgment Model. NEW! Next Generation NCLEX® (NGN)-style case studies provide optimal preparation for the Next Generation NCLEX Examination. NEW! Specialized information addresses the unique needs of older adults such as atypical disease presentation, geriatric syndromes, neurocognitive disorders, quality of life with chronic illness, legal and ethical issues, and mental health challenges such as depression and substance abuse. NEW! Coverage of competencies of expanding nursing roles in the care of older adults addresses the continuum of care. NEW! Gerontological expertise is incorporated into nursing actions and complements other nursing texts (including med-surg, community health, mental health, and assessment books) used in programs without a freestanding gerontological nursing course. NEW! Expanded content includes information on COPD guidelines, medication use and misuse, Alzheimer's Disease, wound care guidelines, diagnosis and treatment of sleep-disordered breathing, joint replacement, caregiver strain, hospice and transitional care, and more.

Home Health Nursing
American Medical Association Press

The skilled services troubleshooter takes the mystery out of skilled services and explains exactly when to skill a resident based on government regulations and proven strategies. Never again will you miss out on the benefits and reimbursement you and your resident deserve because you were unsure about the proper rules.

Improving the Quality of Care in Nursing Homes National Academies Press

The purpose of this book is to create a system of documentation that supports the delivery of resident care. The clinical record may be either handwritten or

electronic, but its purpose is to provide the activity professional with information to: *assess each resident's needs *develop a plan of care *establish goals to be achieved and outcomes expected *document interventions *evaluate the success or need for revision of the care plan

Throughout this book there are references specific to activity programs in nursing facilities and other situations that fall under OBRA guidelines. Federal regulations with interpretive guidelines and sections of the Resident Assessment Instrument (RAI) Version 3.0 Manual that describe documentation requirements are included.

The Unfinished Agenda : an Information Paper Hcpro Incorporated

Complete and accurate documentation is one of the most important skills for a physical therapist assistant to develop and use effectively. The new Second Edition of *Documentation Basics: A Guide for the Physical Therapist Assistant* continues the path of teaching the student and clinician documentation from A to Z. Mia Erickson and Rebecca McKnight have updated this Second Edition to reflect changes of the American Physical Therapy Association and the ever-evolving profession. Updated inside *Documentation Basics: A Guide for the Physical*

Therapist Assistant, Second Edition: * The discussion on integrating disablement into documentation * The discussion on how a PTA can show medical necessity and need for skilled care * The discussion on using documentation to communicate with other providers * Writing the assessment and plan to coincide with the initial documentation * Sample notes completed on forms * More examples and practice, including physical agents, school-based services, pediatrics, traumatic brain injury, spinal cord injury, and interventions consistent with the Guide to Physical Therapist Practice * Medicare reimbursement in different settings * The importance of consistent, reliable, and valid measurements * How to improve communication and consistency between documentation by the PT & the PTA The discussion on disablement has also been updated, shifting away from the Nagi Model toward the International Classification of Functioning, Disability, and Health (ICF). In addition, the PTA Normative Model has been integrated throughout to include more information on clinical decision making. New inside *Documentation Basics: A Guide for the Physical Therapist Assistant, Second Edition*: * Navigating the PT plan of care...A step-by-step

model for PTAs to use as they navigate the initial PT documentation and plan of care * How the PTA uses the PT goals from the initial examination and evaluation Positive and negative aspects of using electronic documentation and a discussion on integrating SOAP notes and the problem-oriented medical record into electronic documentation * Sample notes and discussion of documentation in school-based settings, early intervention, skilled nursing settings, in-patient rehabilitation, and direct access * Medicare Parts C and D * Cash-based services and pro bono services Instructors in educational settings can visit www.efacultylounge.com for additional material to be used for teaching in the classroom. *Documentation Basics: A Guide for the Physical Therapist Assistant, Second Edition* is the perfect guide for all physical therapist assistant students and clinicians who want to update and refine their knowledge and skills in documentation.

Home Health Assessment Criteria Createspace Independent Publishing Platform

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need

know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, <http://www.ahrq.gov/qual/nurseshdbk>.

ICD-10, G Codes, Goal Writing and Ethics for Subacute Rehabilitation and Skilled Nursing Home Facilities

Springer Publishing Company
The shifting demographic toward a "graying" population -- coupled with today's reality of managed care -- makes the need for high-quality, cost-effective psychiatric services within the nursing care setting more urgent than ever. As we increase the number of our years, it is also imperative that we enhance the quality of those years. The product of the American Psychiatric Association's (APA's) Council on Aging and its Committee on Long-Term Care and of the Elderly, the Manual of Nursing Home Practice for Psychiatrists stands out because it focuses on the "how" -- not the "why" -- of nursing home care. Of exceptional importance is its detailed discussion of the Minimum Data Set (MDS), a structured assessment required by

both Medicare and Medicaid for all residents of skilled nursing facilities. Divided into six sections, this "how to" volume contains practical information readers can use right away, from getting reimbursed by insurance companies to handling nursing facility politics: Clinical -- History; evaluation and management of psychiatric problems in long-term care patients; an overview of the MDS; sexuality within the nursing home care setting Regulatory -- Introduction to the Nursing Home Reform Act of 1987 (part of OBRA-87) and its implications for psychiatric care; details about the Resident Assessment Instrument (RAI), which includes the MDS, the Resident Assessment Protocols (RAPs), and Utilization Guides specified in the State Operations Manual (SOP) Financial -- Documentation, reimbursement, and coding; what to look for when contracting with nursing homes Legal and ethical -- The dehumanizing effect of diagnostic labels and the ethical issues inherent in regulating daily schedules (e.g., bed, meal, and bath times); nursing home placement; competence and decision-making ability; comfort care for end-stage dementia; coping with Alzheimer's disease; and the role of caregivers Summary and Future Perspectives -- A detailed vision about how psychiatrists can improve the diagnosis and treatment of nursing home patients Appendixes and bibliography -- Staffing recommendations and assessment instruments Edited by a distinguished authority and former

chair of the APA's Committee on Long-Term Care and Treatment of the Elderly, this comprehensive volume will appeal to a wide audience of professionals: from general psychiatrists, nurse practitioners, and clinical nurse specialists, to primary care physicians and residents.

Nursing Notes the Easy Way
Mosby Incorporated

As more people live longer, the need for quality long-term care for the elderly will increase dramatically. This volume examines the current system of nursing home regulations, and proposes an overhaul to better provide for those confined to such facilities. It determines the need for regulations, and concludes that the present regulatory system is inadequate, stating that what is needed is not more regulation, but better regulation. This long-anticipated study provides a wealth of useful background information, in-depth study, and discussion for nursing home administrators, students, and teachers in the health care field; professionals involved in caring for the elderly; and geriatric specialists.

What Nursing Home and Assisted Living Nurses Need to Know in a Nutshell
Lippincott Williams & Wilkins

With a new focus on evidence-based practice, the 3rd edition of this authoritative reference covers every aspect of

infusion therapy and can be applied to any clinical setting. Completely updated content brings you the latest advances in equipment, technology, best practices, guidelines, and patient safety. Other key topics include quality management, ethical and legal issues, patient education, and financial considerations. Ideal as a practical clinical reference, this essential guide is also a perfect review tool for the CRNI examination. Authored by the Infusion Nurses Society, this highly respected reference sets the standard for infusion nursing practice. Coverage of all 9 core areas of INS certification makes this a valuable review resource for the examination. Material progresses from basic to advanced to help new practitioners build a solid foundation of knowledge before moving on to more advanced topics. Each chapter focuses on a single topic and can serve as a stand-alone reference for busy nursing professionals. Expanded coverage of infusion therapy equipment, product selection, and evaluation help you provide safe, effective care. A separate chapter on infusion therapy across the continuum offers valuable guidance for treating patients with infusion therapy needs in outpatient, long-term, and home-care, as well as hospice and ambulatory care centers. Extensive information on specialties addresses key areas such as oncology, pain management, blood components, and parenteral nutrition. An evidence-based approach and new Focus on Evidence boxes throughout the book emphasize the importance of research in achieving the best possible patient outcomes. The user-friendly design highlights essential information in handy boxes, tables, and lists for quick access. Completely updated coverage ensures you are using the most current infusion therapy guidelines available.

HC Pro, Inc.
"Provides primary care providers with information specific to the medical management of acutely ill adult and elder patients with multiple comorbid health problems. It also contains material on advanced directives, end of life care and regulatory and compliance concerns that often affect treatment decisions in these settings. A section on staff education is also included for nurse practitioners who are directing patient care given by both skilled and unskilled staff in subacute and long term care." --Cover.
[Nursing Documentation Made Incredibly Easy](#)
Jones & Bartlett Publishers
Handbook of Home Health Standards: Quality, Documentation, and Reimbursement includes everything the home care nurse needs to provide quality care and effectively document care based

on accepted professional standards. This handbook offers detailed standards and documentation guidelines including ICD-9-CM (diagnostic) codes, OASIS considerations, service skills (including the skills of the multidisciplinary health care team), factors justifying homebound status, interdisciplinary goals and outcomes, reimbursement, and resources for practice and education. The fifth edition of this "little red book has been updated to include new information from the most recently revised Federal Register Final Rule and up-to-date coding. All information in this handbook has been thoroughly reviewed, revised, and updated. Offers easy-to-access and easy-to-read format that guides users step by step through important home care standards and documentation guidelines Provides practical tips for effective documentation of diagnoses/clinical conditions commonly treated in the home, designed to positively influence reimbursement from third party payors. Lists ICD-9-CM diagnostic codes, needed for completing CMS billing forms, in each body system section, along with a complete alphabetical list of all codes included in the book in an appendix. Incorporates hospice care and documentation standards so providers can create effective hospice documentation. Emphasizes the provision of quality care by providing guidelines based on the most current approved standards of care. Includes the most current NANDA-approved nursing diagnoses so that providers have the most accurate and up-to-date

information at their fingertips. Identifies skilled services, including services appropriate for the multidisciplinary team to perform. Offers discharge planning solutions to address specific concerns so providers can easily identify the plan of discharge that most effectively meets the patient's needs. Lists the crucial parts of all standards that specific members of the multidisciplinary team (e.g., the nurse, social worker) must uphold to work effectively together to achieve optimum patient outcomes. Resources for care and practice direct providers to useful sources to improve patient care and/or enhance their professional practice. Each set of guidelines includes patient, family, and caregiver education so that health care providers can supply clients with necessary information for specific problems or concerns. Communication tips identify quantifiable data that assists in providing insurance case managers with information on which to make effective patient care decisions. Several useful sections make the handbook thorough and complete: medicare guidelines; home care definitions, roles, and abbreviations; NANDA-approved nursing diagnoses; guidelines for home medical equipment and supplies. Small size for convenient carrying in bag or pocket! Provides the most up-to-date information about the newest and predominant reimbursement mechanisms in home care: the Prospective Payment System (PPS) and Pay For Performance (P4P). Updated terminology, definitions, and language to reflect the federal agency change from

Health Care Financing Administration (HCFA) to Centers for Medicare & Medicaid Services (CMS) and other industry changes. Includes the most recent NANDA diagnoses and OASIS form and documentation explanations. New interdisciplinary roles have been added, such as respiratory therapist and nutritionist./LI>

As the baby-boomer generation

ages, nursing home care is

likely to become a major social

problem. New residents will

put huge strains on already

short staffing at a time when

funding to government-assisted

homes (75 percent of all

nursing homes) is lower than ever. Based on her ten years of experience working as a Licensed Practical Nurse in many care facilities, attorney Donna M. Reed shares her insider knowledge to help ensure that nursing home residents receive the best care possible. Reed focuses on the following key points: The legal requirements of nursing homes regarding delivery of care? The ways in which many nursing homes regularly break these laws? Detailed descriptions of how the typical nursing home operates? The responsibilities of each nursing home employee? Nursing home inspections? Residents' rights? How to avoid substandard care? What actions to take to improve nursing home life? Reed's firsthand knowledge of nursing home care and her in-depth understanding of the legal requirements that protect residents offer invaluable information to readers concerned about a loved one in a nursing home. Donna M. Reed worked as a nursing assistant and Licensed Practical Nurse in numerous nursing homes in California and New England. She is now an attorney and lives in North Carolina.

Long-Term Care Medicine: A Pocket Guide lessens the uncertainty involved in caring for patients in a long-term care facility. This practical pocket guide is divided into four sections: Introduction, Common Clinical Conditions, Psychosocial Aspects, and Special Issues in Long-Term Care. The chapters address all the varied components of the LTC system as well as how to take care of the patients and residents living within it. The contributors to this easy-to-read guide are passionate about LTC and many have worked within the American Medical Directors Association to create and disseminate a knowledge base for practitioners. Long-Term Care Medicine: A Pocket Guide is an invaluable resource for clinicians, practitioners, and educators who are seeking to optimize the care and living experience of residents in LTC by providing resident-centered care as well as resident choice, well-being, dignity, and an improved quality of life.
