Mac OS X: The Missing Manual, Tiger Edition  
SDC Publications

With the election of Donald Trump, economic nationalism has re-emerged as a patriotic rallying cry. But are imports and “foreigners” really to blame for the disappearance of good jobs in the United States? Tracing the history and politics of economic nationalism from the American Revolution to the present, historian Dana Frank investigates the long history of “Buy American” campaigns and their complexities. This entertaining story is full of surprises, including misguided heroes, chilling racism, and more than a few charlatans. Frank helps reframe the debate between free trade, on the one hand, and nationalism on the other, to suggest alternative strategies that would serve the needs of working Americans—instead of the interests of corporations and economic elites—and that

don’t cast “foreigners” or immigrants as our “enemies.”

Morton Publishing Company

This book was written to support the development of art assets and virtual environments for Serious Games and Architectural Visualization. It caters to those who do not have any experience with 3D

modeling, texturing and scene building in a real-time virtual environment. This book focuses on utilizing Autodesk's 3DS Max as the 3D modeling tool, Allegorithmic's MapZone as the texture creation tool, and Terathon's C4 Engine as the real-time virtual environment scene builder. Many of the chapters in this book were written independent of one another to allow students to explore, and use their creativity and imagination in creating their own virtual environments.

This comprehensive work takes you on a personal tour of the universe using nothing more than a pair of binoculars. More comprehensive than any book currently available, it starts with Earth's nearest neighbor, the moon, and then goes on to explore each planet in the solar system, asteroids, meteors, comets and the sun. Following this, the reader is whisked away into deep space to explore celestial bodies including stars that are known and many sights less familiar. The final chapter includes a detailed atlas of deep-sky objects visible through binoculars. The appendices include guidance on how to buy, care for and maintain astronomical binoculars, tips and hints on using them, and detailed information on several home-made binocular mounts.

The eye, the camera's lens, and the computer screen all treat color differently. This important addition to

the designer's reference library helps resolve the differences among the numerous media that contemporary designers work with every day. Comprehensive in scope, it brings together key elements of color theory, practice, and application, addressing a wide range of issues specific to graphic design in both print and digital media. Beyond step-by-step techniques for managing color in modern graphic design practice, *Designer's Color Manual* also addresses topics which help designers understand color in a variety of disciplines, looking at historical color systems, color in art, and the psychology of color, among dozens of other topics. Author and designer Tom Fraser also takes other graphics-related practices into account -- interior design, digital rendering, packaging and merchandise design -- aiding the designer in mastering the far-reaching effects of color in almost any project. Heavily illustrated with over 1,000 color images, *Designer's Color Manual* addresses an area that's been gray for too long in the full-color
