In this thorough inventory of software products used in indexing, professional indexers share their favorite features, tips, and techniques. As one would expect, the major dedicated indexing programs (Authex, CINDEX, MACREX, SKY Index, and wINDEX) are compared, but today's indexers are asked to do more than produce print indexes. They need tools to make indexes Web-compatible: HTML/Prep, HTML Indexer, and RoboHelp are covered. They have to embed indexing entries into originating documents: Framemaker, Microsoft Word, PageMaker, and Ixgen are covered. Voice recognition software is described, and a review of Sonar Bookends provides value for those contemplating automatic indexing. Here is an essential guide for indexers and technical writers desiring to maximize the efficiency of

their day-to-day indexing and meet special project needs.

How would you like to discover a comet? Or be the first person to recognize a new star? This book will tell you how, and more! Writing for amateur astronomers using backyard equipment, noted astronomer, Bill Liller, describes exactly how to search the night skies for the unexpected, and what techniques work best for making astronomical discoveries. Author Liller covers all kinds of objects, such as comets, asteroids, novae, and supernovae that an amateur can hope to find as a result of systematic searching. One chapter also includes sage advice from successful amateurs, such as David Levy and Minoru Honda (comets), Bob Evans (supernovae), and Eleanor Helin and Brian Manning (asteroids), who share the secrets of their methods. The use of electronic technology is included, as well as instructions on how to publicize a discovery. Extensive appendices contain a wealth of essential data for every new discoverer of cosmic events. William Liller is the coauthor (with Ben Mayer) of the Cambridge Guide to Astronomy (1985) and has had a minor planet (3222) named after him.

Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this – one that provides a complete, detailed guide to buying, using and maintaining NexStar telescopes. Although this book is highly comprehensive, it is suitable for beginners – there is a chapter on "Astronomy Basics" – and experts alike. Celestron's NexStar telescopes were introduced in 1999, beginning with their first computer controlled "go to" model, a 5-inch. More models appeared in quick succession, and Celestron's new range made it one of the two dominant manufacturers of affordable "go to" telescopes.
