*Mutative Media* is a sweeping examination of how communication technologies have contributed to changes in people ' s thoughts and actions, and thus in the power structures of societies, in the past, at present, and in four alternative futures. We start by surveying what is generally known about the emergence of human language and speech that has

enabled humans to extend their organizing abilities beyond that of other hominids. We then review research on the emergence of signs, symbols, and eventually writing, which led to new ways of thinking, acting, and organizing in scribal societies and vastly extended human influence globally. We consider the impact of the printing press in Europe, the Middle East, China, and Korea that led to various ways of thinking and organizing in modern societies, and conclude our historical survey with a discussion of the emergence and impact of electric and electronic communication technologies from the nineteenth century to the present. After a brief overview of what " futures studies " is and is not, based on our extensive experience in the field, we present four generic alternative futures, and discuss a prototype of a hybrid, mixed-reality game designed to enable players to experience the power and potential of new communication technologies within four very different environments and conditions. We think you will be intrigued by our surprising findings and what they may mean for future generations!

Every film analysis includes reviews, four-star ratings, background information, plot synopses, accurate running times, consumer tips, and MPAA ratings. Brief guides to made-for-TV movies, direct-to-video releases, foreign films that were never theatrically released in the U.S., and live-action films with significant animation round out the volume.
