Heroes are often admired for their ability to act without having "one thought too many," as Bernard Williams put it. Likewise, the unhesitating decisions of masterful athletes and artists are part of their fascination.

Examples like these make clear that spontaneity can represent an ideal.

However, recent literature in empirical psychology has shown how vulnerable our spontaneous inclinations can be to bias, shortsightedness, and irrationality. How can we make sense of these different roles that spontaneity plays in our lives? The central contention of this book is that understanding these two faces of spontaneity—its virtues and its vices—requires understanding the "implicit mind."

In turn, understanding the implicit mind requires considering three sets of questions. The first set focuses on the architecture of the implicit mind itself. What kinds of mental states make up the implicit mind? Are both "virtue" and "vice" cases of spontaneity products of one and the same mental system? What kind of cognitive structure do these states have, if so? The second set of questions focuses on the relationship between the implicit mind and the self. How should we relate to our spontaneous inclinations and dispositions? Are they "ours," in the sense that they reflect on our character or identity? Are we responsible for them? The third set focuses on the ethics of spontaneity. What can research on self-regulation teach us about how to improve the ethics of our implicit

minds? How can we enjoy the virtues of spontaneity without succumbing to its vices? Bringing together several streams of philosophical and psychological research, *The Implicit Mind* is the first book to offer a philosophical account of implicit attitudes. What is the best way to see the world's greatest mountain range--the Himalayas? It's the Annapurna Circuit in Nepal, the most popular footpath in Asia. Its genius lies in its design. Trekkers wind their way around and along some of the world's greatest peaks, ultimately getting near 18,000 feet,

without ever having to do any "technical climbing." This Circuit is widely considered one of the world's great treks; mortals from all around the world come to Nepal for the chance to make the journey. Bill Walker ("Skywalker") struggled his way through the Annapurna Circuit in 2012. He has written this entertaining tale of his journey in this land of Sherpas, cold, altitude, and rushing water.

Since the times of Thomas Jefferson and Benjamin Franklin, Americans have headed off to Europe on odysseys of self-improvement. Inspired by them, Bill Walker ("Skywalker") decided to undertake a 500-mile trek on El Camino de Santiago, which stretches from the Pyrenees in southern France to Santiago in Northwest Spain. Better yet, he did it in the "Holy Year" of 2010, when 200,000 pilgrims were struggling on foot to make it to the Great Gothic Cathedral in Santiago de Compostela. The Camino is supposed to be a religious-spiritual pilgrimage. At Walker's side is his 18-year-old nephew, Gavin. The sharp banter between the two of them is reminiscent of the

dialogue between Bill Bryson and Katz in *A Walk in the Woods*. Midwest Book Review calls *The Best Way* "a strong pick for those considering the journey themselves."

Filmmakers have often encouraged us to regard people with physical disabilities in terms of pity, awe, humor, or fear as "Others" who somehow deserve to be isolated from the rest of society. In this first

history of the portrayal of physical disability in the movies, Martin Norden examines hundreds of Hollywood movies (and notable international ones), finds their place within mainstream society, and uncovers the movie industry's practices for maintaining the status quokeeping people with disabilities dependent and "in their place." Norden offers a dazzling array of physically disabled characters who embody or break out of the stereotypes that have both influenced and been symptomatic of societys fluctuating relationship with its physically disabled minority. He shows us "sweet innocents" like Tiny Tim, "obsessive avengers" like Quasimodo, variations on the disabled veteran, and many others. He observes the arrival of a new set of stereotypes tied to the

growth of science and technology in the 1970s and 1980s, and underscores movies like *My Left Foot* and *The Waterdance* that display a newfound sensitivity. Nordens in-depth knowledge of disability history makes for a particularly intelligent and sensitive approach to this long-overlooked issue in media studies.

Despite the theories about the “ death of tragedy ” , this book explores fragments and reflections of tragedy in postmodern film. Tragedy has changed and evolved with human society, and its continuous chain from Ancient Greece to modern times has been broken by postmodernism. However, certain aspects of tragedy have continued to be used by literature and film: in particular, films with themes of chaos, violence, popular culture, paranoia, virtual reality

and alienation often use aspects of tragedy.

The focus of this study is on these facets adopted by postmodern film.

The Pacific Crest National Scenic Trail (PCT) is the perfect place for an average person to do something extraordinary. Bill Walker ("Skywalker"), who stands 6'11", might seem like anything but average. Yet in a brutally honest tone, he lays to bare all his considerable weaknesses and fears. Among these are crushing weight loss and fatigue, along with a fear of getting lost or a bear stealing his food.

Nonetheless, he is bound and determined to hike the PCT, which at 2,663 miles, runs all the way from Mexico to Canada. The PCT's calling card is its stunning beauty. It has a diversity of geography unequaled by any footpath in the world. Haunting and beckoning the PCT hiker are the implacable desert, the towering majesty of the so-called High Sierra, and the ruggedly bleak, northern Cascade range. Indeed, the PCT hiker faces much greater extremes of terrain and climate than on the famed Appalachian Trail. Completing this demanding challenge calls for overwhelming clarity of purpose. Walker's signature characteristic as a writer is his real talent in capturing people ("Skywalker's humor, his delight in human foibles appeal to a broad audience."--Jeff Minnick, Smoky Mountain Book News). Obviously, he is a people person because he

runs into and vividly describes a truly colorful cast of characters from seemingly all walks of American life. Among these are Uber Bitch, Shit Bag, and Serial Killer; the reader learns how these hikers ended up with their names (hint: blunders). The reader need not worry that Walker is a bully. Throughout this irreverent narrative, he turns his considerable supply of humor back on himself in ruthlessly self-deprecating fashion. It all makes for a delightful read.

The perfect gift for anyone who embraces the joy of fandom and geeking out, this collection of essays celebrates the fans of Star Wars, Star Trek, Doctor Who, Sherlock Holmes, Lord of the Rings, and much more. Pop Culture and sci-fi guru Ryan Britt

has never met a monster, alien, wizard, or superhero that didn't need further analysis. Essayist Ryan Britt got a sex education from dirty pictures of dinosaurs, made out with Jar-Jar Binks at midnight, and figured out how to kick depression with a Doctor Who Netflix-binge. Alternating between personal anecdote, hilarious insight, and smart analysis, *Luke Skywalker Can't Read* contends that *Barbarella* is good for you, that monster movies are just romantic comedies with commitment issues, that *Dracula* and *Sherlock Holmes* are total hipsters, and, most shockingly, shows how virtually everyone in the *Star Wars* universe is functionally illiterate. Romp through time and space, from the circus sideshows of 100 years ago to the Comic Cons of today, from darkest corners of the Galaxy to the comfort of your couch. For anyone who pretended their flashlight was a lightsaber, stood in line for a movie at midnight, or dreamed they were abducted by aliens, *Luke Skywalker Can't Read* is full of answers to questions you haven't thought to

ask, and perfect for readers of Chuck Klosterman, Rob Sheffield, and Ernest Cline. "Ryan Britt is . . . the Virgil you want to guide you through the inferno of geekery." —Lev Grossman, author of the bestselling *Magician's* trilogy
