Mount the plastic thing to the back of the slide projector. Remember you might need to drill two holes to do so. Now slide in the former bulb holder in its position. If the heat sink is too wide to fit, use little force to push the sides apart. Do the wiring. Make sure you use cable straps to avoid cables stopping the fan.

Number each mount in the upper right-hand corner of the film's shiny side. Insert your first slide into the first slot in the tray so that the number is visible on the outer circumference of the tray. Insert your second slide in the second slot with the emulsion (dull side) facing your first slide, and so on.
