The gallbladder when contracts should squeeze out its bile into the intestine. Reduced contraction is seen during the scan as reduced emptying of the radioactivity from the gallbladder. Reduced contraction may result from inflammation or scarring of the wall. It gives symptoms and signs similar to gall bladder or duct obstruction by stones.

Slow emptying gallbladder - Answers on HealthTap

The most accurate way to measure the function of your gallbladder is called a HIDA scan, which your doctor can order. A HIDA scan is a nuclear medicine imaging test that tracks the production and flow of bile from your liver via your bile ducts and gallbladder and thence to your small intestine.
