Materials. Ducts can be made out of the following materials: Galvanized steel. Galvanized mild steel is the standard and most common material used in fabricating ductwork because the zinc coating of this metal prevents rusting and avoids cost of painting. For insulation purposes, metal ducts are typically lined with faced fiberglass blankets (duct liner) or wrapped externally with fiberglass ...

Why Round? Without spiral round duct, here are a few of the things that could happen.. 1. You won't follow the ASHRAE Advanced Energy Design Guides – it's a big deal to try and reduce energy use in commercial buildings by 30% and 50%. And ASHRAE has worked extensively to help its' members achieve these goals by compiling research and assembling cost feedback that might be impractical ...

Overview. The main areas of noise  
mitigation or abatement are:  
transportation noise control,  
architectural design, urban planning  
through zoning codes, and  
occupational noise control.

Roadway noise and aircraft noise  
are the most pervasive sources of  
environmental noise. Social  
activities may generate noise levels  
that consistently affect the health  
of populations residing in or  
occupying areas ...
