A mildly humorous journey through the real, and often financially disappointing world of buying the perfect used car, a full color photo visual guide intended to enlighten prospective buyer's, to the many pitfalls lying in wait for so many. The pre-purchase visual guide is a series of actual full color photograph's, (66) depicting various conditions of neglect, or seemingly minor problem, which left unattended has lead to a catastrophic failure. You're then shown in photo detail along with full explanation, consequences resulting from the inaction to resolve that minor problem. Professional advice as to what is deemed to be good, needs attention, or directs you to look elsewhere. These are the vehicles to be avoided, remember, you are searching for the "almost new, used vehicle".

 Fundamentals of Automotive Technology: Principles
 and Practice covers crucial material for career and
 technical education, secondary/post-secondary, and

community college students and provides both
 rationales and step-by-step instructions for virtually
 every non-diagnosis NATEF task. Each section
 provides a comprehensive overview of a key topic
 area, with real-life problem scenarios that encourage
 students to develop connections between different
 skill and knowledge components. Customer service,
 safety, and math, science, and literary principles are
 demonstrated throughout the text to build student
 skill levels. Chapters are linked via cross-reference
 tools that support skill retention, critical thinking, and
 problem-solving. Students are regularly reminded
 that people skills are as important as technical skills in
 customer service fields.
