*Occupational Outlook Handbook, 2009*  
As the world economy continues to

evolve, businesses and industries must adopt new practices and processes in order to survive. Quality and cost control, work teams and participatory management, and an infusion of technology are transforming the way people work and do business. Employees are now expected to read, write, and communicate effectively; think creatively, solve problems, and make decisions; and interact with each other and the technologies in the workplace. Vocational-technical programs must also adopt these

---

practices in order to provide graduates who can enter and advance in the changing work world. The curriculum framework in this document reflects these changes in the workplace and a number of other factors that impact on local vocational-technical programs. Small Engine and Turf Equipment Repair Technology is designed to provide students with entry level skills needed to compete in today's turf equipment industry. Training is provided in the areas of Engine Repair, Diagnostic

skills, Cutting Systems, Chassis Repair, Electrical Systems and Shop Management Skills. Students may earn a Technical Certificate in Small Engine and Turf Equipment Repair by completing the 33 hours of required TEM courses and a computer applications course. Students desiring to earn an Associate of Applied Science degree in Small Engine and Turf Equipment Repair must earn an additional 28 hours including required academic courses and

approved electives. Courses in the program have been correlated to standards for turf equipment programs as published by the Equipment and Engine Training Council, a nationally recognized association for the outdoor power equipment industry. Appended are: (1) Proposed Standards for Small Engine and Turf Equipment Repair Technology Programs; (2) Related Academic Standards; and (3) 21st Century Skills. A list of

Secondary vocational-technical education programs in Mississippi are faced with many challenges resulting from sweeping educational reforms at the national and state levels. Schools and teachers are increasingly being held accountable for providing true learning activities to every student in the classroom. This accountability is measured through increased requirements for mastery and attainment of

competency as documented through both formative and summative assessments. The courses in this document reflect the statutory requirements as found in Section 37-3-49, Mississippi Code of 1972, as amended (Section 37-3-46). In addition, this curriculum reflects guidelines imposed by federal and state mandates (Laws, 1988, ch. 487, Section 14; Laws, 1991, ch. 423, Section 1; Laws, 1992, ch. 519, Section 4 effective from and after July 1, 1992; Carl D.
