DIANE Publishing

With this book, you  
can handle all of the  
maintenance needs of  
your four-stroke  
small engine,  
whatever the brand,  
and take on virtually  
any repair project.

It guides you through  
each procedure in  
clear, concise steps,  
with more than 325  
color photographs and  
illustrations. Small  
Engine Care & Repair  
provides more than  
just detailed  
instructions and  
glossy photos. It  
teaches you the  
principles of small  
engine operation, so  
you can broaden your  
knowledge, whether  
you're performing  
maintenance or  
repairs or just want  
to understand your  
equipment better.

This book is a

Occupational Outlook Handbook,

1996-1997

As the world economy continues to evolve, businesses and industries must adopt new practices and processes in order to survive. Quality and cost control, work teams and participatory management, and an infusion of technology are transforming the way people work and do business.

Employees are now expected to read, write, and communicate effectively; think creatively, solve problems, and make decisions; and interact with each other and the technologies in the workplace. Vocational-technical programs must also adopt these practices in order to provide graduates who can enter and advance in the changing work world. The curriculum framework in this document reflects

these changes in the workplace and a number of other factors that impact on local vocational-technical programs. Small Engine and Turf Equipment Repair Technology is designed to provide students with entry level skills needed to compete in today's turf equipment industry. Training is provided in the areas of Engine Repair, Diagnostic skills, Cutting Systems, Chassis Repair, Electrical Systems and Shop Management Skills. Students may earn a Technical Certificate in Small Engine and Turf Equipment Repair by completing the 33 hours of required TEM courses and a computer applications course. Students desiring to earn an Associate of Applied Science degree in Small Engine and Turf Equipment Repair

must earn an additional 28 hours including required academic courses and approved technical programs. Courses in the program have been correlated to standards for turf equipment programs as published by the Equipment and Engine Training Council, a nationally recognized association for the outdoor power equipment industry. Appended are: (1) Proposed Standards for Small Engine and Turf Equipment Repair Technology Programs; (2) Related Academic Standards; and (3) 21st Century Skills. A list of suggested references is provided for each unit. (Contains 3 footnotes.).  
**Modern Motorcycle Technology**  
The Small Gas Engines Workbook includes a variety of questions, in various formats, to help reinforce the student's understanding of the

material presented in the textbook chapters. Step-by-step jobs in the Workbook guide the students through important engine service procedures. The Workbook also includes sample Equipment & Engine Training Council (EETC) technician certification tests for the four-stroke and two-stroke areas of certification. These tests help the students prepare for EETC certification.  
*Bulletin of the United States Bureau of Labor Statistics*  
Secondary vocational-technical education programs in Mississippi are faced with many challenges resulting from sweeping educational reforms at the national and state levels. Schools and teachers are increasingly being held accountable for providing true learning activities to every student in the classroom. This accountability is measured through increased requirements for mastery and attainment of competency as documented through both formative and summative assessments. The courses in this document reflect the

statutory requirements as found in Section 37-3-49, Mississippi Code of 1972, as amended (Section 37-3-46). In addition, this curriculum reflects guidelines imposed by federal and state mandates (Laws, 1988, ch. 487, Section 14; Laws, 1991, ch. 423, Section 1; Laws, 1992, ch. 519, Section 4 effective from and after July 1, 1992; Carl D. Perkins Vocational Education Act III, 1998; and No Child Left Behind Act of 2001). Small Engine Repair is an instructional program that generally prepares individuals to repair small internal-combustion engines used on portable power equipment such as lawn mowers, chain saws, rotary tillers, motorcycles, and lawn and garden tractors. Students in Small Engine Repair I complete study in safety, tools and equipment, fasteners, measuring, engine identification and inspection, basic engine principles and design, lubrication systems, cooling systems, fuel systems, basic electricity, and ignition systems. Students in Small Engine Repair II

complete study in safety, charging systems, starting systems, exhaust systems, overhaul of four-stroke and two-stroke cycle engines, governor systems, shop management, and troubleshooting. Appended are: (1) Equipment & Engine Training Council Standards for Small Engine Repair; (2) Academic Standards; (3) Workplace Skills for the 21st Century; (4) National Educational Technology Standards for Students; and (5) Evaluations and Rubrics for Small Engine Repair. (Contains 7 footnotes.).
