Product Overview. This Predator® gasoline engine water pump engine can quickly transfer clear water at speeds up to 35 GPM (gallons per minute). The gas engine on the pump makes it ideal for use during power outages and at remote jobsites. A durable cast iron volute and impeller combined with high quality silicon carbide seals ensure long service life.

Small Gas Engine Water Pump

Find a small drain bolt located on the very bottom middle of the carburetor. Place a small container that gas won't melt under it and remove it with the wrench kit. Let the old gas drain out of the bottom until the new gas starts to flow out. Screw the drain bolt back into the bottom of the carburetor.
