The True Adventures  
of a Vagabond Butter  
worth-Heinemann  
After a ways I could  
see a huge boat  
mostly buried in the  
sand, while  
examining the boat it  
seemed to have been  
a cabin cruiser about  
65 feet long. Then  
walking about 100  
feet south of the boat  
I was stunned to find  
a human body, not  
something you see  
every day. The  
person was mostly a  
skeleton although  
hair was evident on  
his head; jeans and  
shirt were tattered  
and the skull looking  
toward the sky where  
I could see some  
primitive dental  
work. After a couple  
more frightening  
traverses, while

hanging in space, I  
thought we had  
passed the most  
difficult situations,  
wrong again! We  
came to a place where  
you're climbing along  
the cliff face with no  
more than 4 inches of  
rock on which to  
place your feet. That  
accelerated my  
heartbeat a tad! While  
hiking on a narrow  
dike I came face to  
face with a Bison  
almost blocking my  
passage. As I walked  
past he charged me. I  
yelled "Stop That!"  
and he stopped about  
2 feet away. Few  
people have a desire  
or capability to  
experience 'the edge'.  
For most of my life I  
professed, "To  
experience life as close  
to the edge as possible  
to death, as this is the  
only way to live a life  
to its fullest." Being up  
here, among 12,000

foot peaks, in the  
enchanted time  
before sunrise, will  
always remain as a  
consummate memory  
in my mind. I was  
filled with a delightful  
wonderment. Then  
there came the serene  
Alpine Glow as the  
sun embraced the  
mountain peaks. As  
John Muir would say,  
"A noble experience."  
The sun would  
occasionally pop out,  
followed by dark  
clouds and usually  
hail or sleet. I didn't  
care; I was wet; in a  
numbing trance and  
reduced to taking  
baby steps  
forward-'one step at a  
time'. Around 6 pm I  
reached the road,  
which was back down  
at 10,000 feet. I had  
only traveled 8 1/2  
miles, but on the most  
difficult trek of my  
life. We had chased  
the Gator near shore;

---

I jumped from the boat in knee deep mud; struggling through the mud I grabbed the Gator with my left hand and immediately he came around and imbedded his teeth in my right arm. Just as quickly he let go and I loaded him into the boat.

Mostly I was concerned with infection, but a little Rum in the holes took care of that.

In retrospect it is difficult to accept that Western democracies have implicitly supported, or at least tolerated, the legalized system of white supremacy in South Africa known as apartheid. Renate Pratt's new book, In Good Faith, explains why the Christian churches were among the first to publicly protest, and why they provided such cogent and determined international support for the struggle against apartheid. The

Taskforce on the Churches and Corporate Responsibility is a coalition of Christian churches that for nearly twenty years was one of Canada's leading anti-apartheid advocates. As the first co-ordinator of this Taskforce, Renate Pratt was at the centre of the early anti-apartheid initiatives in Canada and consequently is able to supply a clear and accurate view. The book traces the history of exchanges between the Taskforce and successive ministers and senior civil servants of the Department of External Affairs. It

details the reluctant and weak responses offered by the Canadian government and business community right up to the time of Nelson Mandela's release from prison. In Good Faith will be of particular interest to Canadian Christians concerned with ecumenical co-operation and with the social and political dimensions of their faith. Equally, it will appeal to those interested in the impact of public interest organizations on public policy or the relationship between politics and business interests.

The True Adventures of a Vagabond is the story of a young boy growing up in Brooklyn without a father and learning first hand street sense where nothing comes easy for survival in a big city that would, curiously and eventually come in handy in his successful street-smart career as a Special Agent. His early years unwittingly started the chain of life events that would lead him to many foreign countries and meeting some of the most powerful men in the world. The early

story continues with the stealing of a car, the engagement to his first wife who happened to be engaged to someone else, and a direction with more question marks than answers, and who, with everything going against a kid growing up in an urban environment, became one of the highest decorated Special Agent within his field of expertise. Most of SA DePasquale's writings emerged in the form of hundreds of Criminal Investigations later prosecuted in a federal court. Along the way in his notable career, from Asia to Africa to

---

Latin America and elsewhere, SA DePasquale enjoyed an insider-view at the highest levels of government and intelligence that few are privy to. He participated in major drug arrests and investigations that included U.S. involvement, in more ways than commonly acknowledged, with the South American drug trade and the capture of Manuel Noriega. SA DePasquale's career ended in retirement after being informed by his superiors that an up-coming inspection was more important than the surveillance of a known drug dealers home who had been threatened with death by his suppliers, this lack of surveillance resulted not only with the death of the drug dealer but the brutal death of his four young kids. The writing was on the wall, passing an inspection was more important than the life of others, it was time for him to leave. After retirement his adventures continued, looking for answers in places there were none, what was SA DePasquale looking for? Maybe after reading this book someone has the answers, until then his adventures continue.

"As a reference book it has to be classed as one of the best! There should be a copy of it in every college library." Association of Motor Vehicle Teachers' Newsletter  
The Motor Vehicle has been an essential reference work for both the student and practising engineer ever since the first edition appeared in 1929. Today it is as indispensable to anyone with a serious interest in vehicle design techniques, systems and construction as it was then. The current edition has undergone a major revision to include seven new chapters. These include Electric Propulsion; covering all aspects from lead acid and

---

alternative batteries to fuel cells and hybrid vehicles, Static and Dynamic Safety, and Wheels and Tyres. The chapter on the compression ignition engine has been expanded to form three chapters, concentrating on aspects such as common rail injection, recently developed distributor type pumps and electronic control of injection. Automatic, semi-automatic and continuously variable ratio transmissions are covered in two new chapters. A third contains information on the latest developments in computer-aided control over both braking and traction, for improving vehicle stability, while another contains entirely new

information on the practice and principles of electrically-actuated power-assisted steering. Also included is coverage of material detailing the latest knowledge and practice relating to safety systems, vehicle integrity, braking systems and much more. The established layout of the book is retained, with topics relating to the Engine, Transmission and Carriage Unit dealt with in turn. Each chapter is well-provided with diagrams, sections, schematics and photographs, all of which contribute to a clear and concise exposition of the material under discussion. Latest extensive revisions to a well-established title New chapters on

electric propulsion and vehicle safety.

This book is my personal journal of my boatbuilding project. I hope it will be useful to anyone considering undertaking such a task. I'm not an expert by any stretch of the imagination when it comes to building a boat. I'm strictly an amateur builder with very little experience. I've built a couple small boats when I was younger. I helped my dad and brother build a little runabout and I built a johnboat in my living room one time, but other than

that, I have only done routine carpenter and cabinet type work building houses. I do not possess any special skills or education, which makes this task easy for me. I learned a lot about boats in the service where I was a vessel master for the US Army. I got my masters certificate, which qualified me to operate unlimited tonnage open ocean vessels for the military. These are the sum total of my qualifications to try to build a boat. I'm not saying it isn't a formidable task no matter your qualifications, just that if I can do it, anyone can.

During the initial wave of powered farming in the early 20th century, most medium- to large-scale farmers traded in their mules for tractors.
