The Airbus A380 is the world's most recognized and most talked about airliner since the Boeing 747 and Concorde appeared in the skies in the late 1960s. Designed to challenge Boeing's monopoly in the large-aircraft market, it made its first flight in April 2005, entering commercial service two years later with Singapore Airlines. This jet has become so popular that every four minutes--24 hours a day, seven days a week--an A380 is taking off or landing somewhere in the world.

There is no other development in recent aviation history to rival this remarkable aircraft.

The sensational story of smart traces the decade-long history of this ambitious project, talking to key figures from every stage of the programme and building a vivid picture of an idea ahead of its time.- Inside information from within VW, never before published- The real reasons VW Group dropped the program and DaimlerChrysler picked it up- Secret approaches to other carmakers- What happened? The guiding light of the project speaks out for the first time- Full and frank interviews with today's leading authorities- Smart design - today, tomorrow and in 2010- Not so much a car, more a way of thinking: what the brand experts
