This is mainly a photographic reference book to classic scooters and microcars with specification data presented in A to Z order of manufacturer. There are also nostalgic recollections by the author based on ownership and personal experience. In the middle 1950s as a teenager Mike Dan became interested in these then newly-arrived forms of transport. Eventually Mike owned a series of scooters and a microcar. He became involved in Scooter and Microcar Clubs and took part in many local and national sporting events gaining a collection of awards and trophies. In the mid 1980s he had time again to visit many indoor and outdoor classic vehicle shows.

Eventually this led to a renewed personal involvement in the restoration of a series of over twenty classic scooters and three classic microcars. This highly entertaining book and reference source is therefore written with the authority of a lifetime enthusiast.

The Big Book of Tiny Cars Vintage

January '42. L.A. reels behind the shock of Pearl Harbor. Local Japanese residents are rounded up and slammed behind bars. Massive thunderstorms hit the city. A body is unearthed in Griffith Park. The cops tag it a routine dead-man job. They're wrong. It's an early-warning signal of Chaos. There's a murderous fire and a gold heist. There's Fifth Column treason on American soil. There are homegrown Nazis, Commies, and race racketeers. It's populism ascendant. There's two dead cops in a dive off the jazz-club strip. And three men and one woman have a hot date with history. Elmer Jackson is a corrupt Vice cop. He's a flesh peddler and a bagman for the L.A. Chief of Police. Hideo Ashida is a crime-lab whiz, lashed by anti-Japanese rage. Dudley Smith is PD hardnose working Army Intelligence. He's gone rogue and gone all-the-way fascist. Joan Conville was born rogue. She's a defrocked Navy lieutenant and a war profiteer to her core. L.A. '42. Homefront madness. Wartime inferno--This Storm is James Ellroy's most audacious novel yet. It is by turns savage, tender, elegiac. It lays bare and celebrates crazed Americans of all stripes. It is a masterpiece.

Car The Crowood Press

A narrative like no other: a cultural history that explores how cars have both propelled and reflected

the American experience—from the Model T to the Prius. From the assembly lines of Henry Ford to the open roads of Route 66, from the lore of Jack Kerouac to the sex appeal of the Hot Rod, America 's history is a vehicular history—an idea brought brilliantly to life in this major work by Pulitzer Prize – winning journalist Paul Ingrassia. Ingrassia offers a wondrous epic in fifteen automobiles, including the Corvette, the Beetle, and the Chevy Corvair, as well as the personalities and tales behind them: Robert McNamara 's unlikely role in Lee Iacocca 's Mustang, John Z. DeLorean 's Pontiac GTO , Henry Ford 's Model T, as well as Honda 's Accord, the BMW 3 Series, and the Jeep, among others. Through these cars and these characters, Ingrassia shows how the car has expressed the particularly American tension between the lure of freedom and the obligations of utility. He also takes us through the rise of American manufacturing, the suburbanization of the country, the birth of the hippie and the yuppie, the emancipation of women, and many more fateful episodes and eras, including the car 's unintended consequences: trial lawyers, energy crises, and urban sprawl. Narrative history of the highest caliber, Engines of Change is an entirely edifying new way to look at the American story.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

The story of smart is an epic tale of genius, inspiration, hope, disappointment, disaster and ultimate triumph. Funky, stylish and fun, smart is the youngest and most exciting brand of car on the market - and it has revolutionised the way we think about cars and the way we use them. It has put much-needed fun back into driving, and even city motorists smile when they're at the wheel of a smart. But it nearly didn't happen at all. The revolutionary design was the product of the genius who invented the Swatch watch, saving the near-bankrupt Swiss watch industry in the process. But these visionary ideas proved too radical and the tiny two-seater almost died at birth when a succession of backers lost their nerve. The sensational story of smart traces the decade-long history of this ambitious project, talking to key figures from every stage of the programme and building a vivid picture of an idea ahead of its time.
