McLaren: The Engine Company is the previously untold story of McLaren Engines, an American company founded in 1969 by Bruce McLaren and his partners to build engines for McLaren's legendary Can-Am and Indy Cars. From this base in suburban Detroit were born the mighty big-block Chevrolet V8s that powered the iconic orange cars to two of their five consecutive Can-Am championships. McLaren's busy dyno rooms also spawned the howling turbo Offenhausers that put Mark Donohue and Johnny Rutherford in Victory Lane at Indianapolis three times between 1972 and 1976. For decades this non-descript shop was the hotbed of horsepower for factories and top independents alike. McLaren Engines developed the turbocharged Cosworth DFV Formula 1 engine that powered Indy cars for both Team McLaren and Penske Racing. It rendered BMW's turbo engine for U.S. IMSA racing that later became BMW's Formula 1 weapon. The long list of race engines developed here powered Buick Indy and IMSA cars, BMW GTP cars, Cadillac LeMans prototypes, Porsche Trans-Am 944s and David Hobbs' F5000 single seaters. There were McLaren-built big-block turbo V8s for offshore boat racing and even a Cosworth-Vega engine for American dirt tracks! Author Roger Meiners combines his life-long passion for motor racing and technology with his historian's sensibilities to make the engines, cars, and key personalities come alive within this book's pages. Ride along with Meiners as he uncovers little-known details of the company's transition from a race shop to an engineering company, developing lust-worthy performance cars such as the sensational 1987 Buick GNX, the 1989 Pontiac Grand Prix Turbo, the FR500 Ford Mustang concept, and other projects that the public never saw. Today the company, known as McLaren Engineering, is a subsidiary of Canada-based Linamar Corporation, and is sought after by global automakers for its unrivaled testing, development and manufacturing capability.

It's the years 1964 and 1965 . . . Malt Shops . . . jukeboxes with rock and roll . . . souped-up cars at the dragstrip . . . high school games . . . house and school parties . . . high school games . . . movies at the theater . . . and the Vietnam War! Paul Edmonds is head over heels in love with his fellow classmate, Rosa Kay Robinson, at Detroit's Southwestern High School. Paul has a crush on her and is going out of his way to develop a relationship with her, despite her mother's objections. As members of the Class of 1965, Paul is an outstanding athlete on the school football, basketball and track teams; while Rosa is a member of the cheer team. They use that time to see each other. Her good friend and classmate, and fellow cheerleader, Patty Wisniewski, also makes sure they spend time together. Paul is an outstanding drag racer at Detroit Dragway with his 421 Pontiac Tempest nicknamed Little Rosa. But the dark cloud of the Vietnam War comes into focus and drives them closer together. They make an effort for their love to work!

This is mainly a photographic reference book to classic scooters and microcars with specification data presented in A to Z order of manufacturer. There are also nostalgic recollections by the author based on ownership and personal experience. In the middle 1950s as a teenager Mike Dan became interested in these then newly-arrived forms of transport. Eventually Mike owned a series of scooters and a microcar. He became involved in Scooter and Microcar Clubs and took part in many local and national sporting events gaining a collection of awards and trophies. In the mid 1980s he had time again to visit many indoor and outdoor classic vehicle shows. Eventually this led to a renewed personal involvement in the restoration of a series of over twenty classic scooters and three classic microcars. This highly entertaining book and reference source is therefore written with the authority of a lifetime enthusiast.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Excerpt: Smart is an automotive branch of Daimler AG. Smart is a German manufacturer of microcars produced in Hambach, France, and Boblingen, Germany. It is marketed as the "smart" in all lower-case, with the Smart brand logo, as of 2010, denoting a letter "c" for "compact" and an arrow for "forward thinking." In the late 1980s, SMH (makers of the Swatch brand of watches) CEO Nicolas Hayek began developing an idea for a new car using the same type of manufacturing strategies and personalization features used to popularize Swatch watches. He believed that the automotive industry had ignored a sector of potential customers who wanted a small and stylish city car. This idea soon became known as the "Swatchmobile." Hayek's private company Hayek...

Car 'The Rosen Publishing Group, Inc'

The story of smart is an epic tale of genius, inspiration, hope, disappointment, disaster and ultimate triumph. Funky, stylish and fun, smart is the youngest and most exciting brand of car on the market - and it has revolutionised the way we think about cars and the way we use them. It has put much-needed fun back into driving, and even city motorists smile when they're at the wheel of a smart. But it nearly didn't happen at all. The revolutionary design was the product of the genius who invented the Swatch watch, saving the near-bankrupt Swiss watch industry in the process. But these visionary ideas proved too radical and the tiny two-seater almost died at birth when a succession of backers lost their nerve. The sensational story of smart traces the decade-long history of this ambitious project, talking to key figures from every stage of the programme and building a vivid picture of an idea ahead of its time.
