An insufficient amount of detergent will result in a partial

removal of dirt from the dishes, whereas an excessive amount is wasteful and does not improve the washing results. Page 28 The introduction of detergent into the rinse aid dispenser, even in liquid form, will damage the dishwasher.

User Manuals | Smeg AU
Your Smeg dishwasher has a self-diagnostic system that detects and signals a number of possible Smeg dishwasher faults. Smeg dishwasher error codes include the following – all numbers are prefixed with the letter E: 01 – this indicates that the anti-flooding system has been activated – meaning that the water level in your dishwasher is at too high a level. Reasons for this include a faulty valve, a blocked filter, or a result of adding too much detergent causing

excessive foaming.

Manuals - Smeg PLANETARIUM WASH SYSTEM.

Equipped with patented technology, Smeg 60cm dishwashers fitted with the planetarium wash system benefit from the very best wash coverage.

movement is the key; the main wash arm revolves clockwise whilst the stem moves in the opposite direction on a second axis. This spiralling directional motion sprays water evenly in a 360° sweep at a pace of around 65rpm.

Smeg Dishwasher Error Codes | Troubleshooting and Manuals
Smeg is proud to

introduce the “semi-pro” dishwasher – a domestic dishwasher which utilises the innovations from Smeg’s industrial machines to produce the fastest full-power wash in just 16 minutes. Smeg’s continual development in dishwashing engineering has most recently resulted in Australia’s first 6 Star WELS water rated dishwasher. The new “315” series high-performance dishwashers

wash in as little as 9.8 litres of water.
