**Bodyguard 38 | Smith & Wesson**  
The Smith and Wesson Bodyguard is one such gun that is quite popular these days. Other than its size and weight, it has amazing features that cannot be found in many other similar guns. These include its second strike capability, rear adjustable sights, a safety lever and a loaded chamber indicator.

## Thumb Safety

An interesting talking point about Smith & Wesson Bodyguard 380 is its manual safety feature. As is the case with all 1911 guns, it sits on the left side, right there at the top of your gun ' s frame. The minute you activate this safety, the trigger remains stuck. You will not manage to shoot a single bullet until you undo the safety.

the new M&P Bodyguard 38 revolver is double action only and features a 1.875 " stainless steel barrel with a lightweight, one-piece aluminum alloy upper frame, making it an ideal choice for concealed carry and personal protection.

### Smith & Wesson M&P Bodyguard 380 Semi-Auto Pistol | Cabela's

As predicted, the Bodyguard 380 without a thumb safety was present at the SHOT Show. Other than the lack of the thumb lever, everything else seemed the same on the pistol. I ' m glad to see this offered as an option by Smith & Wesson. Â If sales of the M&P Shield without an external safety are any indication, this will sell well for the company.
