The invention of mass marketing led to cigarettes being emblazoned in advertising and film, deeply tied to modern notions of glamour and sex appeal. It is hard to find a photo of Humphrey Bogart or Lauren Bacall without a cigarette. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. And no product has received such sustained scientific scrutiny. The development of new medical knowledge demonstrating the dire harms of smoking ultimately shaped the evolution of evidence-based medicine. In response, the tobacco industry engineered a campaign of scientific disinformation seeking to delay, disrupt, and suppress these studies. Using a massive archive of previously secret documents, historian Allan Brandt shows how the industry pioneered these campaigns, particularly using special interest lobbying and largesse to elude regulation. But even as the cultural dominance of the cigarette has waned and consumption has fallen dramatically in the U.S., Big Tobacco remains securely positioned to expand into new global markets. The implications for the future are vast: 100 million people died of smoking-related diseases in the 20th century; in the next 100 years, we expect 1 billion deaths worldwide. A holistic understanding of the physical, psychological and spiritual benefits of marijuana which bridges the gap between ancient wisdom and modern science. By documenting that cannabis impacts the Autonomic Nervous System to restore balance to the body, mind,

and spirit, the author shows marijuana's unique value for health and consciousness. According to High Times: "If you would like to be one of those people who seem to know everything important there is to know about marijuana, this is the book you out to read..Bello presents it all with balance, lucidity and a sort of calm spirituality that you rarely encounter..It's the sort of book you can dip into at random, absorbing nonconsecutive sections at your leisure." Decolonizing the Lens of

Power Simon and Schuster Revolutionary turmoil in France threatens to cross the English border—and tear apart an increasingly tense marriage—in this “brilliant” gothic thriller (Publishers Weekly, starred review). It is 1792, and Europe is seized by political unrest. In England, Lizzie Fawkes has grown up among Radicals who’ve followed the French Revolution with eager optimism. But Lizzie has recently married John Diner Tredevant, a developer who

is heavily invested in Bristol's housing boom, and he has everything to lose from social upheaval and the prospect of war. As the strain of financial setbacks and the secrets of his past converge upon him, his grip on what he considers his rightful property—including Lizzie—only grows tighter...From an Orange Prize winner and Whitbread Award finalist, this is a novel with a “charged radiance” (The New York Times) that explores romanticism and disillusionment, terror and love, and the dangerous

lines between them. “Dunmore knows how to let a narrative move like an arrow in flight...A man rows from Bristol to a glade where he has left his dead wife overnight. He must bury her fast, where no one will find her. From the start, Birdcage Walk has the command of a thriller as we keep company with John Diner Tredevant, an 18th-century property developer building a magnificent terrace in Clifton, high above the Avon Gorge. Lizzie, his second wife, does not know the details of what happened to

his first. Nor do we know as much as we might suppose...The novel’s cast is marvelous and vivid.”—The Guardian “Explores the impact of the French Revolution on 1790s England within the context of a gothic romance set in Bristol...[a] magnificently complex villain.”—Kirkus Reviews

To some it's the classic "gateway drug", to others it is a harmless way to relax, or provide relief from crippling pain. Some fear it is a dangerous drug with addictive properties; to others still it is a legal

anomaly and should be decriminalized. Whatever the viewpoint, and by whatever name it is known, cannabis--or marijuana, hashish, dope, pot, weed, grass, ganja--incites debate at every level, and the effect it has on the cultures and economics of every corner of the globe is undeniable. In this definitive study, Martin Booth crafts a tale of medical advance, religious enlightenment, political subterfuge and human rights; of law enforcement and custom officers, cunning smugglers, street pushers, gang warfare, writers, artists, musicians, and happy-go-lucky hippies and potheads. Booth chronicles the fascinating and often mystifying process through which cannabis, a relatively harmless

substance, became outlawed throughout the Western world, and the devastating effect such legislation has on the global economy. Above all, he demonstrates how the case for decriminalization remains one of the twenty-first century's hottest topics.

Aboriginal Ontario: Historical Perspectives on the First Nations contains seventeen essays on aspects of the history of the First Nations living within the present-day boundaries of Ontario. This volume reviews the experience of both the Algonquian and Iroquoian peoples in Southern

Ontario, as well as the Algonquians in Northern Ontario. The first section describes the climate and landforms of Ontario thousands of years ago. It includes a comprehensive account of the archaeologists' contributions to our knowledge of the material culture of the First Nations before the arrival of the Europeans. The essays in the second and third sections look respectively at the Native peoples of Southern Ontario and Northern Ontario, from 1550 to 1945. The final section looks at more recent developments. The volume includes numerous

illustrations and maps, as well as an extensive bibliography. The Chimney of the World Oxford University Press First published in 1987, Peter Brimblecombe's book provides an engaging historical account of air pollution in London, offering a fascinating insight into the development of air pollution controls against a changing social and economic background. He examines domestic and industrial pollution and their effects on fashions, furnishings, buildings and human health. The book ends with an intriguing analysis of the dangers arising from

contemporary pollutants and a glimpse of what the future may hold for London.

Sixteen new stories and fifteen classics by the National Book Award – winning, New York Times – bestselling author of *War Dances*. Sherman Alexie 's stature as a writer of stories, poetry, and novels has soared over the course of his twenty-book, twenty-year career. His wide-ranging, acclaimed fiction throughout the last two decades—from *The Lone*

Ranger and Tonto *Fistfight in Heaven* to his most recent PEN/Faulkner Award – winning *War Dances*—have established him as a star in contemporary American literature. A bold and irreverent observer of life among Native Americans in the Pacific Northwest, the daring, versatile, funny, and outrageous Alexie showcases his many talents in *Blasphemy*, where he unites fifteen beloved classics with sixteen new stories in one sweeping anthology for devoted fans and first-time readers. Included here are some of his most esteemed tales, including “ *What You Pawn I Will Redeem*, ” in which a homeless Indian man quests to win back a family heirloom; “ *This Is What It Means to Say Phoenix*,

Arizona,” a road-trip morality tale; again reasserts himself as one the
“ The Toughest Indian in the World,” about a night shared
between a writer and a hitchhiker; and his most recent, “ War
Dances,” about a man grappling with sudden hearing loss in the
wake of his father’s death. Alexie’s new stories are fresh and
quintessential, about donkey basketball leagues, lethal wind
turbines, a twenty-four-hour Asian manicure salon, good and bad
marriages, and all species of warriors in America today. An
indispensable Alexie collection, *Blasphemy* reminds us, on every
thrilling page, why Alexie is one of our greatest contemporary writers
and a true master of the short story. *Praise for Blasphemy* “ Alexie once

most compelling contemporary practitioners of the short story. In
Blasphemy, the author demonstrates his talent on nearly every page. . . . [Alexie] illuminates the lives of his characters in unique, surprising, and, ultimately, hopeful ways.” —*Boston Globe* “ Alexie writes with arresting perception in praise of marriage, in mockery of hypocrisy, and with concern for endangered truths and imperiled nature. He is mischievously and mordantly funny, scathingly forthright, deeply and universally compassionate, and wholly magnetizing. This is a must-have collection.” —*Donna Seaman, Booklist* (starred review) “ [A] sterling collection of short stories by

Alexie, a master of the form. . . . The newer pieces are full of surprises. . . . These pieces show Alexie at his best: as an interpreter and observer, always funny if sometimes angry, and someone, as a cop says of one of his characters, who doesn’t “ fit the profile of the neighborhood.” “ —*Kirkus Reviews* (starred review)

From a psychiatrist on the frontlines of addiction medicine and an expert on the history of drug use comes the "authoritative, engaging, and accessible" history of the flower that helped to build
(*Booklist*) -- and now

threatens -- modern society. Opioid addiction is fast becoming the most deadly crisis in American history. In 2018, it claimed nearly fifty thousand lives -- more than gunshots and car crashes combined, and almost as many Americans as were killed in the entire Vietnam War. But even as the overdose crisis ravages our nation -- straining our prison system, dividing families, and defying virtually every legislative solution to treat it -- few understand how it came to be. Opium tells the "fascinating" (Lit Hub) and at times harrowing tale of how we arrived at today's crisis, "mak[ing] timely and startling connections among painkillers, politics, finance, and society" (Laurence Bergreen). The story begins with the discovery of poppy artifacts in ancient Mesopotamia, and goes on to explore how Greek physicians and obscure chemists discovered opium's effects and refined its power, how colonial empires marketed it around the world, and eventually how international drug companies developed a range of powerful synthetic opioids that led to an epidemic of addiction. Throughout, Dr. John Halpern and David Blistein reveal the fascinating role that opium has played in building our modern world, from trade networks to medical protocols to drug enforcement policies. Most importantly, they disentangle how crucial misjudgments, patterns of greed, and racial stereotypes served to transform one of nature's most effective painkillers into a source of unspeakable pain -- and how, using the insights of history,

state-of-the-art science, and a compassionate approach to the illness of addiction, we can overcome today's overdose epidemic. This urgent and masterfully woven narrative tells an epic story of how one beautiful flower became the fascination of leaders, tycoons, and nations through the centuries and in their hands exposed the fragility of our civilization. This is the intriguing story of tobacco advertising--from the beginning of the 20th century to the final years when tobacco companies were forced to stop advertising and look for alternative ways of promoting their products. A complete history, this compendium shows how tobacco companies have battled fiercely to reach new markets, rejected claims

of a link between tobacco and fatal illnesses, and finally fought against the implementation of advertising restrictions. The inclusion of more than eighty bold advertisements reflect the social and cultural changes seen in these turbulent years and show the fascinating development of 20th-century tobacco advertising.

Leading experts on the science, history, politics, medicine, and potential of America's most popular recreational drug • With contributions by Andrew Weil, Michael Pollan, Lester Grinspoon, Allen St. Pierre (NORML), Tommy Chong, and others • Covers marijuana's physiological and psychological effects, its

medicinal uses, the complex politics of cannabis law, pot and parenting, its role in creativity, business, and spirituality, and much more Exploring the role of cannabis in medicine, politics, history, and society, *The Pot Book* offers a compendium of the most up-to-date information and scientific research on marijuana from leading experts, including Lester Grinspoon, M.D., Rick Doblin, Ph.D., Allen St. Pierre (NORML), and Raphael Mechoulam. Also included are interviews with Michael Pollan, Andrew Weil, M.D., and Tommy Chong as well as a pot dealer and a farmer who grows for the U.S. Government. Encompassing the broad spectrum of marijuana knowledge from

stoner customs to scientific research, this book investigates the top ten myths of marijuana; its physiological and psychological effects; its risks; why joints are better than water pipes and other harm-reduction tips for users; how humanity and cannabis have co-evolved for millennia; the brain's cannabis-based neurochemistry; the complex politics of cannabis law; its potential medicinal uses for cancer, AIDS, Alzheimer's, multiple sclerosis, and other illnesses; its role in creativity, business, and spirituality; and the complicated world of pot and parenting. As legalization becomes a reality, this book candidly offers necessary facts and authoritative opinions in a society full of

marijuana myths, misconceptions, and stereotypes.

The Big Smoke (Routledge Revivals) Taylor & Francis

In this book the author, an investigative journalist, traces the social history of marijuana from its origins to its emergence in the 1960s as a defining force in an ongoing culture war. He describes how the illicit marijuana subculture overcame government opposition and morphed into a multibillion-dollar industry. In 1996, Californians voted to legalize marijuana for medicinal purposes. Similar laws have followed in several other states, but not without antagonistic responses from federal, state, and local law enforcement. The author draws

attention to underreported scientific breakthroughs that are reshaping the therapeutic landscape: medical researchers have developed promising treatments for cancer, heart disease, Alzheimer's, diabetes, chronic pain, and many other conditions that are beyond the reach of conventional cures. This book is an examination of the medical, recreational, scientific, and economic dimensions of the world's most controversial plant.

Smoke Signals is a historical milestone in Native American filmmaking. Released in 1998 and based on a short-story collection by Sherman Alexie, it was the first wide-release feature film written, directed, coproduced, and acted by

Native Americans. The most popular Native American film of all time, *Smoke Signals* is also an innovative work of cinematic storytelling that demands sustained critical attention in its own right. Embedded in *Smoke Signals*'s universal story of familial loss and renewal are uniquely Indigenous perspectives about political sovereignty, Hollywood's long history of misrepresentation, and the rise of Indigenous cinema across the twentieth and twenty-first centuries. Joanna Hearne's work foregrounds the voices of the filmmakers and performers—in interviews with

Alexie and director Chris Eyre, among others—to explore the film's audiovisual and narrative strategies for speaking to multiple audiences. In particular, Hearne examines the filmmakers' appropriation of mainstream American popular culture forms to tell a Native story. Focusing in turn on the production and reception of the film and issues of performance, authenticity, social justice, and environmental history within the film's text and context, this in-depth introduction and analysis expands our understanding and deepens our enjoyment of a Native cinema landmark.

With long-time legal and social barriers to marijuana falling across much of the United States, the time has come for an accessible and informative look at attitudes toward the dried byproduct of *Cannabis sativa*.
Marijuana: A Short History profiles the politics and policies concerning the five-leaf plant in the United States and around the world. Millions of Americans have used marijuana at some point in their lives, yet it remains a substance shrouded

by myth, misinformation, and mystery. And nearly a century of prohibition has created an enforcement system that is racist, and the continuing effects of racially-targeted over criminalization limit economic and social opportunities in communities of color.
Marijuana: A Short History tells this story, and that of states stepping up to enact change. This book offers an up-to-date, cutting-edge look at how a plant with a tumultuous history has emerged from the shadows of counterculture and illegality. Today, marijuana has become a remarkable social, economic,

and even political force—with a surprising range of advocates and opponents. Over the past two decades marijuana policy has transformed dramatically in the United States, as dozens of states have openly defied the federal government. Marijuana: A Short History provides a brief yet compelling narrative that discusses the social and cultural history of marijuana but also tells us how a once-vilified plant has been transformed into a serious, even mainstream, public policy issue. Focusing on politics, the media, government, racism, criminal justice, and education, the book describes why public

policy has changed, and what that change might mean for marijuana's future place in society.
